TWENTY-SEVENTH ANNUAL REPORT

OF THE

INDIANA SCHOOL FOR FEEBLE-MINDED YOUTH

FORT WAYNE, INDIANA

For the Fiscal Year Ending October 31, 1905

TO THE GOVERNOR

INDIANAPOLIS:
WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING
1906

504409

09716

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
INDIANAPOLIS, February 20, 1906.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, March 5, 1906.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

WARREN BIGLER,
Auditor of State.

MARCH 6, 1906.

Returned by the Auditor of State, with the above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

FRED L. GEMMER,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, March 6, 1906.

DANIEL E. STORMS,
Secretary of State.

Received the within report and delivered to the printer this 8th day of March, 1906.

HARRY SLOUGH,
Clerk Printing Bureau.

BOARD OF TRUSTEES.

JAMES W. SALE, President, Bluffton.
EDWARD M. WILSON, Treasurer, Fort Wayne.
MRS. MARY ROWAN HARPER, Secretary, Fort Wayne.

OFFICERS.

ALBERT E. CARROLL, Superintendent.
JANE BATTERSHALL, Matron.

MEDICAL DEPARTMENT.

CHARLES R. DANCER, M. D., Resident Physician.
LYMAN T. RAWLES, M. D., Interne.

Medical Consulting Staff.

SURGERY.

MILES F. PORTER, A. M., M. D.

INTERNAL MEDICINE.

B. VAN SWERINGEN, M. D.

EYE, EAR, NOSE AND THROAT.

KENT K. WHEELOCK, M. D

ACCOUNTING DEPARTMENT.

WILLIAM H. SCHEIMAN, Clerk.
FRANK B. WILT, Bookkeeper.
MELVIN DRUCKEMILLER, Storekeeper.
FRANK COHEE, Storekeeper's Assistant.
JANE McCLELLAND, Stenographer.
CARRIE GRIFFITH, Night Clerk.
MARGARET TOWNSEND, Record Clerk.

SCHOOL DEPARTMENT.

CYRUS D. MEAD, Principal.
MRS. BLANCHE MacKELVEY, Kindergartner.
CHARLOTTE VORIS, Kindergartner.
HAZEL LIPINSKI, Kindergartner.
MRS. MARTHA KIMBLE, Kindergartner and Primary.
ETHEL VERNON, Kindergartner and Primary.

MRS. ALICE SUMMERBELL, Intermediate Grades.
GRACE THOMPSON, Intermediate Grades.
MARY WINTERMOTE, Art and Intermediate Grades.
MRS. FANNIE PACE, Needle and Lace.
FRANCES CHAPMAN, Physical Culture.
EMMA JACKLEY, Piano and Voice.
GEORGIANA VON EBERHART, Girls' Orchestra.

HEADS OF DEPARTMENTS.

WILLIAM J. SMITH, Supervisor Colony Farm.
HARRY THOMPSON, Supervisor East Wing Boys' Ward.
NORA GRIFFIN, Supervisoress West Wing Girls' Ward.
ELLA McCORMICK, Supervisoress Custodial Cottage for Girls.
BELLA MacTAVISH, Supervisoress Cottage for Adult Females.
EDITH WOOSTER, Head Nurse.
LEW DE HAVEN, Chief Engineer.
WILLIAM JUERGENS, Woodworking.
WILLIAM MERTZ, Painting.
HENRY GRODZIK, Mattress Making and Band Leader.
FRED KOENIG, Tailoring.
HENRY SCHNABLE, Shoemaking.
ANDREW HEINZLEMAN, Bakery.
CHAS. J. NOLL, Cold Storage.
DAVID M. FYFFE, Farm and Dairy.
FRANK WILHELMS, Garden and Grounds.
JACOB BRETZ, Outside Overseer.
KITTIE HARGRAVE, Laundry.
DORA CORBIN, Dressmaking.
SUSIE CHAPPELL, Mending and Comfort.
MRS. GRACE ABRAMS, Sewing-room "Harper Lodge."
MRS. M. McLAUGHLIN, Sewing-room Colony Farm.

REPORT OF BOARD OF TRUSTEES.

To the Hon. J. Frank Hanly, *Governor of Indiana:*

Sir—The Board of Trustees for Indiana School for Feeble-Minded Youth has the honor to submit for your consideration its twenty-seventh annual report for the fiscal year ending October 31, 1905, together with an extended report in detail by the Superintendent, accompanied by various statistical exhibits covering the financial operations of the institution for the year.

On March 10th the commissions of Mary R. Harper and Edward M. Wilson having expired, both were reappointed by you, Mrs. Harper for a third term and Mr. Wilson for a second. On that date the Board was reorganized by the election of James W. Sale as President, Mary R. Harper as Secretary, and Edward M. Wilson as Treasurer. The year has passed with perfect harmony between the members, and we are pleased to report that the same excellent spirit has prevailed in every department. No changes have been made in the executive force during the year. The Superintendent has had excellent support from his subordinates, and has been able to impart his enthusiasm and methodical business ideas to the heads of departments in such a degree that there has been a marked improvement in discipline and co-operation during the past year. A generous spirit of rivalry and desire to excel seems to pervade every department, which in itself must prove helpful and productive of better results than have yet been achieved. The male employes have been neatly uniformed (at their own expense), making a decided improvement in their appearance. The schools, under the direction of Prof. Cyrus D. Mead, have probably shown the greatest improvement during the year. With the assistance of a faithful corps of teachers, he has

been able to accomplish many needed reforms in the educational training of the children. The report of the Principal will be found herewith.

The work of the medical department has been attended with satisfactory results. The death rate for the fiscal year shows the unequaled record of 2.5 per cent., as against 4.8 per cent. in 1904, and 3 per cent. in 1903. No epidemic of disease has disturbed us during the year, and the number of hospital cases has been below the average.

It is gratifying to your Board to note that notwithstanding there has been a general steady advance in the cost of many commodities required for the use of the institution, there has been a continual decrease in the annual net per capita maintenance cost, exclusive of repairs and painting our per capita maintenance for recent years being as follows:

For year 1902	$122.98
For year 1903	122.73
For year 1904	121.95
For year 1905	121.41

The year just closed is the lowest per capita cost in our history, and yet we believe that the children have never been so well clothed and fed as during the past year. This is accounted for to some extent by the fact that while we have a larger population than ever before, the executive expense has not been increased appreciably; and also, to the fact that with our commodious new store house we have been able to purchase supplies in larger quantities and to better advantage.

The sixty-third General Assembly granted a specific appropriation of four thousand dollars with which to furnish the School a reserve supply of coal. The Board has construed that this amount of coal should be purchased and paid for from the maintenance fund and held in store at the beginning of each fiscal year, and we now have coal in store to the value of this amount available for use during the coming year.

On October 6th we were apprised that the late Hiram Strayer of Chattanooga, Tennessee, having a daughter in the custodial department for adult females, had left us by bequest five hundred dollars "for the benefit of the institution." The money was duly received from his executor and disbursed by the Board as follows:

Piano for custodial department for adult females	$275 00
Piano for custodial girls' cottage	125 00
Musical instruments for girls' orchestra	100 00
	$500 00

Our girls derive more satisfaction and pleasure from music than any other source, and the Trustees, after due deliberation, concluded that more lasting benefit would be had from the expenditure of the gift for this purpose than in any other way.

The sixty-fourth General Assembly made the following specific appropriations:

New kitchen and dining room at Colony Farm, $9,000. This building has been erected in a most satisfactory manner and will be ready for occupancy about January 1st next. The rooms are commodious, well lighted and ventilated, and the improvement will be finished at a cost well within the appropriation.

Addition to laundry and machinery, $5,000. The work contemplated under this appropriation is fully completed and we now have one of the best equipped up-to-date laundries owned by the State, with sufficient capacity for the present needs of the institution.

Heating hospital building, $3,500. This work is completed, and the hospital is now heated in common with all other buildings from the main boiler plant. We will have a neat balance from this appropriation to turn back to the State treasury.

The improvement to heating and power plant is almost finished and promises to be very satisfactory and more economical in the use of fuel by utilizing high pressure dry steam instead of the old low pressure in use heretofore.

One-half of the painting fund, $3,000, has been used this year, the remainder being reserved for the second year of the biennial period.

The appropriation of $3,000 for fire protection in main building at Colony Farm has been expended, and we now have a complete chemical system installed, which reaches every part of the building, including the kitchen and dining room in course of erection.

We also have a specific appropriation of fifty thousand dollars for a new custodial cottage for boys, which is not available until

November 1st, 1905, so that we have been unable to do more than have our plans in course of preparation. They will be adopted and active operations commenced at earliest possible date.

Following are the expenditures from the various funds, both regular and specific, for the fiscal year ending October 31, 1905:

MAINTENANCE FUND.

Regular appropriation	$100,000 00	
Excess on 216.0025 inmates over 800	23,755 49	
Expenditures		$123,345 93
Covered into State treasury unused		409 56
	$123,755 49	$123,755 49

REPAIRS.

Regular appropriation	$5,000 00	
Expenditures		$5,000 00
	$5,000 00	$5,000 00

PAINTING.

Appropriation	$3,000 00	
Expenditures		$1,413 10
Amount unexpended		1,586 90
	$3,000 00	$3,000 00

NEW KITCHEN AND DINING ROOM, COLONY FARM.

Appropriation	$9,000 00	
Expenditures		$3,905 62
Amount unexpended		5,094 38
	$9,000 00	$9,000 00

ADDITION TO LAUNDRY AND MACHINERY.

Appropriation	$5,000 00	
Expenditures		$4,269 31
Amount unexpended		730 69
	$5,000 00	$5,000 00

IMPROVEMENT TO HEATING AND POWER PLANT.

Appropriation	$8,000 00	
Expenditures		$7,673 21
Amount unexpended		326 79
	$8,000 00	$8,000 00

3 1833 05690 7840

FIRE PROTECTION, MAIN BUILDING, COLONY FARM.

Appropriation	$3,000 00	
Expenditures		$2,246 11
Amount unexpended		753 89
	$3,000 00	$3,000 00

HEATING HOSPITAL BUILDING.

Appropriation	$3,500 00	
Expenditures		$1,465 87
Amount unexpended		2,034 13
	$3,500 00	$3,500 00

TUITION RECEIPTS AND INDUSTRIAL PROCEEDS AND EARNINGS.

Receipts from tuition accounts	$4,140 89	
Industrial proceeds and earnings	376 51	
Deposited with State treasurer		$4,517 40
	$4,517 40	$4,517 40

During the past year the number actually present has increased from 1,012 to 1,029; and every department is now crowded to its utmost capacity. We have a large number of urgent applications on file, that have been accepted, which can not be admitted until more room is provided. We ask your careful attention to Superintendent Carroll's report in detail, which shows twenty-six applications for boys' department accepted and waiting, with thirteen applications waiting in girls' department, and three waiting in adult woman's department.

In addition to above we have applications pending and deferred, 8 adult women, 3 boys and 2 girls, with new applications about evenly divided coming in at the rate of ten per month. The new custodial cottage for boys when completed will probably take care of all worthy and needy male applicants for some years to come. Both the adult woman's and the custodial girls' departments are now overcrowded. We believe the caring for defectives of this class to be the most important work of the State, and it is plainly apparent that additional room must be provided.

The Board was honored by your presence at the institution on May 9th of the year closing, and trust that we shall have the pleasure of an official visit from you at your convenience during the ensuing year.

We desire to express our appreciation of the helpful counsel, advice and assistance given by you from time to time in the discharge of the responsible duties that have devolved upon us, in the care of the dependent and unfortunate wards of the State committed to our keeping.

Respectfully submitted,

JAMES W. SALE,
EDWARD M. WILSON,
MARY R. HARPER,
Trustees.

FORT WAYNE, Ind., October 31, 1905.

REPORT OF SUPERINTENDENT.

To the Board of Trustees:

In compliance with the law enacted for the government of the Indiana School for Feeble-Minded Youth, I am pleased to submit herewith the twenty-seventh annual report for the period ending October 31, 1905:

MOVEMENT OF POPULATION.

	Male.	Female.	Total.
Present, beginning of period included in report	475	535	1,010
Absent on leave beginning of period included in report	2	...	2
Total enrolled	477	535	1,012
Present end of	471	565	1,036
Absent on leave	3	...	3
Total enrolled	474	565	1,039
Admitted during period included in report (not counting those returned from furlough)	30	50	80
Discharged, died or withdrawn during same period (not including those furloughed)	33	20	53
Daily average actually present during period included in report	467.224	548.778	1,016.002

The number of completed applications acted upon this fiscal year was: Boys 62, girls 41, adult females 34, total 137. Of this number boys 45, girls 35, adult females 27, total 107, were accepted pending room. Boys 13, girls 6, adult females 2, total 21, were rejected. Action was deferred on boys 3, adult females 6, total 9. The number of inmates admitted was: Boys 30, girls 23, adult females 27, total 80. One girl was discharged from the custodial cottage for girls after having been committed to the cottage for adult females. Two male adults were discharged as being insane, and boys 16, girls 9, total 25, were withdrawn upon application of the parents.

The number of deaths was, boys 16, girls 4, adult females 5, total 25.

Completed applications on file and not acted upon: Boys 2, girls 1, adult females 5, total 8. These will come before your Board at the next regular session for consideration and acceptance. There are on file at this time 42 applications accepted

pending room, as follows: Boys 26, girls 13, adult females 3. These children can only be taken into the institution as vacancies occur, as every department is now taxed to its fullest capacity, and it would be unwise to attempt further crowding. This condition will continue to exist as regards girls and adult females until new buildings can be erected for their benefit, and as appropriations must be secured before this can be accomplished many urgent cases must of necessity be postponed indefinitely. This condition is particularly distressing in the case of adult females, for it is only by segregation of this class that we can hope for a decrease in the population of defectives in our State.

Nearly one-third of our population are epileptic. With the opening of the new village for epileptics we should be able to transfer a number of our inmates to that institution. This would bring some relief, as the vacancies made by those removed could be taken by others who are now on the waiting list. A further benefit accruing to our institution through the establishment of this new village will be a lessening of the number of applications presented to us for acceptance, as all cases of feeblemindedness complicated with epilepsy will be eligible to admission to the village prepared especially for them. With the erection of our new custodial cottage for boys, all males now on the waiting list and those accepted during the intervening time can be received. This building will accommodate from one hundred and fifty to one hundred and seventy-five low-grade inmates, and will enable us to remove from the main building and the Colony Farm all boys belonging to this grade, thus giving room for a larger number of boys belonging to the higher grade and who will be benefited by the instruction given in our school and industrial departments. It will also enable us to make a better classification in our male wards generally.

DISTRIBUTION OF POPULATION.

Main Building—Girls	283
Main Building—Boys	273
Cottage for Custodial Girls	154
Cottage for Adult Females	128
Cottage Colony Farm—Boys	183
Nursery Department Hospital—Boys	18
	1,039

THE SCHOOL DEPARTMENT.

The number of children enrolled in our school department was the same as reported last year, viz.: 422. Every child that can be benefited by school training is enrolled and attends school from three to six hours each day, the period of time depending entirely upon the intelligence and progressiveness of the individual pupil.

I find that much good has resulted from the elimination of show work that has been a part of our schools for so many years. It has enabled the teacher to reach a greater number of pupils and to so outline her work for the year that her lessons follow in regular sequence, so that at the end of the year she can sum up the result of her labors and pass upon the progressiveness of her children without feeling that an injustice may have been done some one. Our corps of teachers, with a few exceptions, remains the same as for several years past. The school department the past year has been most satisfactory and is worthy your commendation. Prof. Cyrus D. Mead was reappointed Principal on July 1st, and has taken up his duties in an earnest and enthusiastic manner, which can only bring success. For further information concerning this department your attention is directed to the report of the Principal.

MEDICAL DEPARTMENT.

The general health of our wards has been good. The institution has been free from epidemics, and no unusual demands have been made upon the department. The number of deaths, as shown by the mortality table in the report of the resident physician, was: Boys 16, girls 4, adult females 5, total 25, being 2.5 of our population, a decrease in the death rate of about 49 per cent. as compared with the last fiscal year.

The removal of the furnaces from the basement of this building and the installation of a new steam heating system has added both to the comfort of the patients and the cleanliness of the department. Other minor changes contemplated during the coming year will add greatly to the convenience and appearance generally. Drs. Miles F. Porter, B. Van Sweringen and K. K. Wheelock remain as members of our medical consulting staff. These gentlemen have given much of their valuable time to our institution the

past year, and I wish to extend to them my very hearty thanks for the many services rendered in connection with the department.

Dr. Lyman T. Rawles, of the class of 1905, Fort Wayne College of Medicine, was appointed as interne to serve for one year. He has been of much assistance to our resident physician in the general medical work of the institution.

Dr. Hugo H. Meier, class of 1905, Indiana Dental College, was appointed dental interne. In the four months he remained with the institution he examined the mouths of all children and gave attention where needed.

Dr. Charles R. Dancer, who has been our resident physician for the past three years, has handed in his resignation, to take effect November 1, 1905. In his connection with the institution he has been painstaking, conscientious and courteous in the discharge of the many duties that have devolved upon him. His one thought has been for the best interests of the children that have come under his care. He leaves the institution to take up private practice, and carries with him the best wishes of his many friends for success in the line of work he has chosen.

Dr. Charles G. Beall, formerly connected with the institution as medical interne, has been appointed resident physician. He is a young man with many qualifications that fit him for the work. He will report for duty on December 3, 1905.

Dr. B. Van Sweringen of our medical consulting staff will have charge of the hospital department until the arrival of Dr. Beall. Your attention is directed to the report of the resident physician.

THE INDUSTRIAL DEPARTMENTS.

The industrial and manual departments remain as reported to you last year, and are as follows: Shoemaking, tailoring, mattressmaking, broommaking, woodworking, carpentering, brickmaking, painting, sewing, mending and comfort making, bakery, laundry, gardening, farming and dairy. A detailed report of the work done by these departments will be found elsewhere. The only changes to report in above departments are in the laundry and broommaking, the work in the laundry being performed entirely by women and girls, and the broommaking being in charge of one of our inmates.

THE HOME GARDEN.

The receipts from our truck garden did not come up to our expectations. This was due principally to the rainy season, which extended beyond the usual planting time. We were fortunate, however, in obtaining an average yield which gave us an abundance of fresh vegetables for the summer months.

COLONY FARM.

We were less fortunate with our crops at the farm than on the home grounds, much of the soil here being heavy clay with very little natural and poor artificial drainage, so that much of the land could not be worked until along in the summer, when it was too late to benefit the crops that called for early planting.

Taking everything into consideration, we have reason to be thankful, inasmuch as we fared as well as our neighbors. Our Holstein herd is in good condition and is increasing in numbers. The swine have been productive. We have taken on sheep raising in a small way, our flock now numbering twenty head. Our stock has been free from epidemics, with only a few head lost by death on account of ordinary diseases. Below is an inventory of live stock on hand October 31, 1905:

Milch cows	52
Heifers, yearlings	6
Calves	16
Bulls	2
Fat hogs and shoats	104
Brood sows	11
Boars	3
Ewes	19
Rams	1
Work horses	13
Colts, two year old	1
Colts, one year old	3
Colts, weanlings	1

RELIGIOUS EXERCISES.

The usual chapel services have been held each Sabbath in the main auditorium as well as in the different detached cottages. Our girls' orchestra now takes part in the services in the main auditorium and has been the means of bringing new life and spirit into the general singing and other exercises.

RECREATION AND AMUSEMENTS.

Entertainments for the children are given biweekly by the employes, assisted by some of the brighter pupils, including the boys' brass band and the girls' orchestra; at other times games, parties and dances are arranged. These are intended as indoor pastimes during the winter months.

As spring appears and the days lengthen, the evenings until dusk are spent upon the spacious playgrounds, where swings, teeter-boards and other sources of amusements are found that only a child knows how to enjoy.

MAINTENANCE.

Our maintenance appropriation for the year was $100,000, based upon an average daily attendance of 800 inmates, with an extra allowance of $110 per capita per annum for all over that number. The average attendance for the year was 1,016.002, thus we were entitled to excess maintenance for 216.002 inmates, amounting to $23,755.49. Our expenditures for all purposes, except repairs and improvements (for which specific appropriations are made) was $123,345.93, making the net per capita cost for the year $121.41. This is a trifle lower than any previous year in the history of the institution.

For the coming year our maintenance appropriation will be $122,000, based upon an average attendance of 1,000 inmates, with an extra allowance of $116 per capita per annum for all over that number.

REPAIRS.

All buildings have been kept in repair. During the coming year it will be necessary to overhaul much of our plumbing and fixtures. With the increased appropriation for repairs, it will be possible to do this.

OTHER APPROPRIATIONS.

The new kitchen and dining-room building at Colony Farm is nearing completion and will be ready for occupancy by January 15th, next. This is a very satisfactory improvement. It removes from the main building all wooden structures, and completes the Colony Farm buildings.

Fire protection for the main building at Colony Farm includes one 500-gallon stationary chemical fire engine of the American-La France type, located in the basement of the main building, with eight (8) stations so distributed over the building that every department is amply protected.

The heating system in the hospital building has been changed. Furnaces and heaters formerly located in the basement have been removed and a Western Paul vacuum system installed, steam for heating the building being now furnished from the central boiler plant.

The laundry building has been enlarged and new equipment installed. There remains but little to be done in completing this work. Our laundry will then be among the best in the State.

The most noteworthy improvement for the year is the change made in our boiler house. There has been a complete re-arrangement in this department. The four old low-pressure boilers have been removed and four (4) 150- horsepower high-pressure boilers have taken their place. Of the two old 125 horsepower high-pressure boilers, one has been placed in the battery with the new boilers, while the older one has been converted into a hot water heater and will furnish hot water for all buildings on the main institution grounds.

A 500- horsepower open feed water heater has been installed and a radical hollow brick chimney, 7 feet by 125 feet, takes the place of the small chimney, which was found of insufficient area to give the proper draft for our new boilers. All of the above improvements will be completed before February 1, 1906.

CUSTODIAL COTTAGE FOR BOYS.

The appropriation for this improvement not being available until November 1, 1905, it was not possible to begin work on the building this year. Architects have been asked to make competitive sketches. When these are passed upon and plans and specifications are ready, contract will be awarded so that work can begin early in the spring. We have about 600,000 brick, manufactured in our yard during the past season to be used in this building, and it will require about 400,000 more to complete the work. These will be made the coming season.

IN CONCLUSION.

I desire to express my thanks to the officers and employes generally for their hearty and cordial support at all times. With their co-operation it has been possible to raise the institution to a high standard of efficiency, and, with their continued efforts this standard will be maintained.

To the Board of Trustees I would record my grateful appreciation for the kindly interest and enthusiasm manifested at all times in carrying on the work of our institution.

Very respectfully submitted,

ALBERT E. CARROLL,

Superintendent.

REPORT OF SCHOOL PRINCIPAL.

To the Superintendent:

The annual report of the school department for the year ending October 31, 1905, follows: Our enrollment, counting out all duplicates, continues about the same, or 405. Not a single day was lost from the nine months' school. We have been enabled to devote more time than heretofore to school work proper, much to the child's advantage. You will note some of the results.

GENERAL SCHOOL WORK.

All work incident to preparing for public and institutional entertainments has been accomplished outside of the regular school hours. A cardinal principle of school is regularity. More effort to hold or retain the interest is required with the mentally deficient than with the ordinary child. The means employed in instruction are different only in degree from the public school. A continual repetition day after day permits us to advance little by little. It is of the utmost importance, then, that the child's mind be not distracted with work foreign to school. And the same is true with the teacher. By such a policy it is pleasant to report a few results.

The morning school of slower children has not been sacrificed for the brighter afternoon ones. Instead of time being spent in drills with the brightest, the daily three-hour period during the morning session has been enforced. New books and new material have been an incentive to better work. In reading and writing, former kindergarten children have made a marked advance. Classes in both morning and afternoon school have been given especial work in phonetic reading.

The upper boys and girls have never before advanced so far. New histories and geographies used in the fourth to seventh grades in the public schools have been given them. In short, the whole body of children has been considered. It is our effort to

distribute equally the advantages, so that all may be raised a little, rather than a few to an extent purchased at the sacrifice of the many.

THE KINDERGARTEN.

By devoting last year two or three days weekly in the kindergarten to letter and sound work, we are now able at the beginning of this term to promote a class of girls and boys into the primer at a younger age than at any time before. The work of the teachers was very thorough. Phonic readers are now given to these pupils which were passed. Phonetic reading is manual training applied to the vocal organs as truly as knife work is to the hands. The progress here is very gratifying. In the present six kindergarten classes the usual games, gifts and occupations are given. The purpose is to direct the child's self activity into channels that will be an asset in school work proper.

THE GRADE.

The different grades are represented to and including the sixth and seventh. It is not our intent to stock a dull mind with subjects foreign to the child's future life. His world is here and any course of study must conform to the child's present and future. English money, interest and percentage, for instance, may have their place in the public schools, but we familiarize our pupil with the inch and foot and yard that he may aid in the shops of the institution; he learns of the pint and quart and halves and thirds that he may assist in the farm dairy or be of help in intelligently working with the gardener or the farmer.

MANUAL AND ART.

A larger and better lighted room for the coming winter will make needle work more enjoyable to the girls. Hedebo embroidery and scrim work with stella floss is added new to the embroidery, hardanger, drawn, raffia and lace work. Needle work is not merely mechanical, neither is it given for pleasure alone. The blending of colors in embroidering flowers is nature study in a little different form. To water color the pansy or shape with floss the violet and strawberry appeals to the sense of the beautiful. Can we have too much for our children? Accuracy, clean-

liness and neatness with linen in our schoolroom means accuracy in the mending room, cleanliness in the laundry and neatness in the kitchen and dormitory.

The sloyd and modeling were new last year, but the results were probably more marked here than in any other line of work. These classes are for our slower pupils. Mechanical drawings of jewel boxes, pencil trays, toy sleds, ladders, wheelbarrows, steps, taborets, etc., are carefully and neatly made on paper before the knife is used to construct. Accuracy, neatness and a quickened interest is carried from the sloyd room into school work. The boys at the bench save the carpenters some time by turning out many pieces of work. The modeling girls complete a great many forms from models and still life and make casts of fruit, birds, fishes, flowers and busts. We are permitted here to form a class from girls who have none of the other pleasures of school.

The girls in art become adept to a surprising degree. Their work is more than creditable. The benefit is not only educational, but ethical. Any child revels in color. The studies train them to see the beauties of nature. They become more observant of nature and apprehend the beautiful in the common things around them. The present classes are not only advancing, but the number has been increased.

MUSIC AND PHYSICAL.

Choruses, quartettes, and solos, together with the band and orchestra, aid in our regular entertainments for the children. The girls' orchestra shows marked improvement under a very competent director. The boys' band is also progressing with many new selections. More piano pupils have been added, noticeably at the cottage for adult women, where a new class is given lessons. Voice culture is receiving more attention, particularly with the boys' divisions, with a better quality of music as the result.

New apparatus for physical culture has been added to the gymnasium. We hope to allow more time to the physically deformed. The muscle must be made subordinate to the will before a sluggish brain can be made so. An evening each week will be given alternately to boys and girls of sound body in physical exercise or basketball.

LAST DAY WORK.

The 25th of June last witnessed the completion of a very successful term. The display in the chapel consisted of work from each department. A few of the noticeable features are mentioned. The kindergarten showed booklets of the various stages in the progress of the child's writing. Nature manuscripts from the grades created favorable comment. The embroidery, hardanger, lace and drawn work were eagerly sought. An outlined muslin quilt by adult women was made after weeks of patient effort.

An attractive corner was filled with studies in water color, sepia, charcoal and pen, taken from nature, still life and the antique. Scenes from "Miles Standish" were illustrated. Especial mention should be made of the portrait of the Governor and the studies in color of the Holland and Japanese girls and the "Old Salt." Three hundred souvenir cards—one hundred made in the presence of visitors—were given away.

THE COMING YEAR.

A complete and permanent record of the child's progress mentally and physically, has been begun this year. A form with the history of the boy or girl previous to his entering the institution should be in the hands of each teacher that she may the more intelligently know her pupil.

We are starting with much new reading matter, not the least valuable of which is a phonetic primer and reader and many primary leaflets dealing with subjects in nature. We regard reading as the principal subject for the child, followed closely by writing, nature and number work. To quicken interest and place a favorable atmosphere for our children, our school rooms are always filled with wall and board decorations, much of it from the child's own work, art or written. Flowers are on window sill and table and in the smaller rooms, each girl or boy has his own separate potted plant to care. A flower show will follow later in the winter. In the spring each room prepares its window garden. Vegetables, fruits, nuts, cocoons, mounted leaves, seed pods, etc., cover shelf and mantle. Each of the boys' rooms has an aquarium filled with snail, mussel, frog, fish and plant life collected by the boys.

It is our purpose this coming year to have the kindergarten feed the birds from their window sills. Other rooms will collect and mount or sketch the plant and animal life of our grounds. For example, a head of each of the grains raised on the farm, with the seed of same, will be mounted; the garden vegetables and fruits will be pencilled, and the amount raised the past year by our farmer and gardener will be stated. Birds that frequent the grounds will be put in water color, insects will be mounted, a leaf and seed from each tree will be pressed and preserved.

The same will be done with our hothouse flowers, also the spring wild flowers. The different species of burrs and pods will be mounted. From the above, booklets will be made. Two rooms will collect and mount the butterflies caught on the playgrounds. The purpose is not so much to give information, but to implant a love for nature, instill kindliness and regard in a breast prone to be cruel, and select such material from active life as will more easily interest the child in a printed page.

Amusement is provided for the children in the biweekly entertainments, birthday and nutting parties, dances, attendance on circuses, the celebration of special days, such as Harvest Home, Arbor Day, Halloween, Thanksgiving, Christmas, Washington's Birthday, Easter and the Fourth of July.

In addition to the band and orchestra directors, twelve lady teachers are associated with me in school work proper. They are all faithful and diligent and have but one end in view—the making of the Indiana school a blessing to the child and a credit to the State. With your continued sympathy and co-operation it can be done.

Respectfully submitted,

C. D. MEAD,
Principal.

REPORT OF RESIDENT PHYSICIAN.

Mr. A. E. Carroll, Superintendent:

The following is submitted as my report of the medical department for the fiscal year ending October 31, 1905:

During the past year we have had no epidemics of any import. During this year, however, there appeared four cases of typhoid fever. Two of these were from the boys' ward and two from the girls' ward of the main building. They occurred separately in point of time and we were unable to locate the source of infection.

Of the other acute infectious diseases we have been more fortunate than usual, having had but four cases of diphtheria, two of pneumonia and one of pleuritis.

Surgical cases have been more numerous this year than ordinarily. The following are the principal ones that appeared for treatment: Four fractured clavicles, two fractures femurs, one incised wound of the wrist severing several tendons and the median nerve (this was repaired with good results); one fractured fibula; one fractured radius; one dislocated patella; one amputation of left forearm and eight radical mastoid operations. The last mentioned were operated by our consulting otologist, Dr. K. K. Wheelock, for the relief of chronic otitis media purluenta. The results were excellent in all excepting one, who had a partial facial paralysis following, because of the extensive necrosis in the mastoid cells. The deaths, as usual, have occurred mostly among the custodial grade, only one high grade inmate dying during this year. The death rate for this year was 2.4 per cent., or one-half of what it was last year. Tuberculosis continues to contribute largely to our death rate, having been responsible for 32 per cent. of causes of death, i. e., uncomplicated pulmonary tuberculosis This we consider to be a healthy decrease, when it is recalled that a few years ago 40 per cent. died from pulmonary tuberculosis, and it averaged 44 per cent. for a period of fourteen years. But one high grade inmate has died from tuberculosis within a period of three years, and he had been a victim of the disease for several years.

We believe that our higher grade children are intelligent enough to prevent in a measure the infection as well as co operate with us in the treatment which is necessary for the successful handling of the disease.

This being the last report I shall write for you, I wish to repeat a request made in the last two reports I have written, i. e., some provision should be made for better equipment as well as additional hospital capacity. We are now caring for 1,040 inmates, with about the same capacity used ten years ago for about 500 inmates. This is also being done with practically the same amount of help in the hospital. All other departments have been increased except the hospital, which has about the same equipment it had five years ago.

In conclusion, I wish to thank those officers and employes, especially of the hospital, who have so kindly co-operated with me. This has been not only pleasant, but has made the work easier for us both, and above all has been of inestimable benefit to the children for whose betterment we have all been working.

Below is submitted the mortality record.

	Name.	Age.	Date of Death.	Cause of Death.	Complicating Conditions.
1.	Kitty Talbert	37	Nov. 18, 1904	Carcinoma of uterus	Custodial grade.
2.	Anna Reece	16	Nov. 27, 1904	Broncho pneumonic phthisis	Custodial grade.
3.	Joseph Redd	24	Dec. 1, 1904	Broncho pneumonic phthisis	Custodial grade.
4.	Raymond Green	17	Dec. 8, 1904	Pulmonary tuberculosis	Custodial grade.
5.	Zina Ackerman	18	Dec. 16, 1904	Tabes mesenterica	Custodial grade.
6.	Orlando Kennedy	22	Dec. 24, 1904	Broncho pneumonic phthisis	Custodial grade.
7.	Rollo Stewart	15	Dec. 24, 1904	Multiple sclerosis	High grade.
8.	Robert Cristy	36	Feb. 5, 1905	Tabes mesenterica	Custodial grade.
9.	Luther Hubbard	27	Feb. 13, 1905	Pulmonary tuberculosis	Custodial grade.
10.	Grace Horn	10	Feb. 19, 1905	Pulmonary tuberculosis	Custodial grade.
11.	Nellie Brown	23	Mar. 13, 1905	Laryngeal diphtheria	Custodial grade.
12.	Emma Kennedy	25	Mar. 18, 1905	Status epilepticus	Medium grade.
13.	William A. Dickey	22	Mar. 21, 1905	Pulmonary tuberculosis	Custodial grade.
14.	Louis Lehman	20	Mar. 30, 1905	Tabes mesenterica	Custodial grade.
15.	James Gilmore	22	April 3, 1905	Pulmonary tuberculosis	Custodial grade.
16.	David Strong	28	April 11, 1905	Status epilepticus	Custodial grade.
17.	Joseph Black	17	May 11, 1905	Status epilepticus	Custodial grade.
18.	Everett Jones	15	May 16, 1905	Status epilepticus	Custodial grade.
19.	Alonzo Long	20	May 27, 1905	Status epilepticus	Custodial grade.
20.	Thomas Broderick	14	June 8, 1905	Status epilepticus	Custodial grade.
21.	Susan Flick	20	June 25, 1905	Pulmonary tuberculosis	Medium grade.
22.	Goldie Rittenhouse	26	Sept. 1, 1905	Pulmonary tuberculosis	Custodial grade.
23.	Benjamin Martin	20	Sept. 6, 1905	Diabetes meletis	Custodial grade.
24.	Emma Eckles	28	Sept. 28, 1905	Tuberculosis pleuritis	Custodial grade.
25.	Thedral McKenzie	12	Oct. 15, 1905	Pulmonary and mesenterica tuberculosis	Custodial grade.

Yours very respectfully,

CHARLES R. DANCER,

Resident Physician.

CYRUS D. MEAD, Principal.
MRS. BLANCHE MACKELVEY, Kindergarten.
HELEN HUTCHINSON, Kindergarten and Primary.
MRS. MARTHA KIMBLE, Primary.
MABLE STINE, Primary.

GRACE EWART, Primary and Intermediate.
MRS. ALICE SUMMERBELL, Intermediate.
GRACE THOMPSON, Intermediate and Grammar Grade.
MARY WINTERMOTE, Art and Grammar Grade.
BERENICE WARREN, Needle and Lace.
GERTRUDE HATCH, Sloyd and Clay Modeling.
FRANCES CHAPMAN, Physical Culture.
EMMA JACKLEY, Piano and Voice.
GEORGE VON EBERHART, Girls' Orchestra.
G. J. THOMPSON, Boys' Brass Band.

HEADS OF DEPARTMENTS.

WILLIAM J. SMITH, Supervisor Colony Farm.
HARRY THOMPSON, Supervisor East Wing Boys' Ward.
NORA GRIFFIN, Supervisoress West Wing Girls' Ward.
ELLA M'CORMICK, Supervisoress Custodial Cottage for Girls.
BELLA MACTAVISH, Supervisoress Cottage for Adult Females.
EDITH WOOSTER, Head Nurse.
LEW DEHAVEN, Chief Engineer.
WILLIAM JUERGENS, Woodworking.
WILLIAM MERTZ, Painting.
HENRY MEURER, Mattress Making.
FRED KOENIG, Tailoring.
GEORGE HENDEE, Shoemaking.
ANDREW HEINZLEMAN, Bakery.
P. J. BOUILLON, Cold Storage.
JOHN DICKSON, Farm and Dairy.
FRANK WILHELMS, Garden and Grounds.
JACOB BRETZ, Outside Overseer.
KITTIE HARGRAVE, Laundry.
ADA V. HART, Dressmaking.
SUSIE CHAPPELL, Mending and Comfort.
MAE BRECKENRIDGE, Sewing Room, Cottage for Adult Females.
Mrs. M. M'LAUGHLIN, Sewing Room, Colony Farm.

REPORT OF BOARD OF TRUSTEES.

To the Honorable J. Frank Hanly, *Governor of Indiana:*

Sir—The Board of Trustees of the Indiana School for Feeble-Minded Youth has the honor to present herewith its twenty-eighth annual report, including the reports of the Superintendent, Principal, and Physician, for the fiscal year ending October 31, 1906.

The personnel and organization of the Board remains the same as it was at our last annual report, viz.: James W. Sale, President, Bluffton; Edward M. Wilson, Treasurer, Ft. Wayne; Mary R. Harper, Secretary, Ft. Wayne. The school has made substantial progress during the past year. The educational department is in charge of a principal keenly alive to the needs of the children attending the school, and his efforts are ably seconded by a most excellent corps of teachers. We respectfully call your attention to his report showing the number of pupils attending the school and the work being done.

The progress made in both vocal and instrumental music has been extremely gratifying. They are potent factors in arousing and holding the attention and interest of the children. The band, the girls' orchestra and the singing classes have afforded much pleasure to all who have heard them. The industrial departments are under the control of persons well qualified to train those under their instruction in the various kinds of work. Altogether 185 boys and 300 girls are receiving industrial training in the different departments.

The school has been free from serious epidemics during the past year and the death rate has been remarkably low, being only 1.86 per cent., as against 2.5 per cent. in 1905, which was the lowest in the history of the Institution. The physical condition of the children reflects credit upon the physician and the management in general.

Each year we are confronted with a number of withdrawals of children from the Institution by their parents or guardians, and although in many of these cases the withdrawals are made against

the judgment of your Board of Trustees, yet we are helpless under the present law to avoid them. We would therefore respectfully call your attention to our earnest recommendation for a change in the law governing the admission of children under sixteen years of age into this Institution. We believe that the State should have the right of permanent supervision and that children should be placed in the Institution by commitment made by the Circuit Court of the county in which such child resides rather than by voluntary application. By doing this the Board of Trustees would become the legal guardian of the child so committed by the court and would be placed in a position to exercise its best judgment in permitting withdrawals from the Institution. We believe this change in the law would conserve the best interests of the State in caring for its unfortunate wards. We would also recommend that the statute be changed so as to define more particularly the class and type of defectives that shall be cared for by this Institution. Sec. 3, Act of 1887, says: "The purpose of this Institution shall be to care for, support, train and instruct feeble-minded children, the term feeble-minded to include idiotic, epileptic and paralytic children." At the time of the enactment of this law the State had no other institution in which the epileptic children could be placed, but we believe from this time on that the new Village for Epileptics should take care of all this class of defectives. The paralytic is not necessarily mentally deficient, and it is neither proper nor just that they be consigned to this Institution and surrounded by those who are mentally deficient.

The Sixty-third General Assembly granted a specific appropriation of $7,000 for fire protection and the extension of water mains from the north limits of the city of Fort Wayne to the Institution grounds. Your Board of Trustees entered into a contract with the Board of Water Works Trustees of the city of Fort Wayne conditioned as follows: That when the territory through which said water main or any part thereof extends shall be taken into the city and the said water main is used by said city, then in that event said city covenants and agrees to refund to the State the actual cost of said water mains or of so much thereof as is taken into the city. The actual cost of the water main from the north limits of the city to the Institution grounds was $3,858.99. On the first of January of the present year all the territory

through which this water main extended was annexed to the city and the water main became the property of the city of Fort Wayne. Your Board of Trustees at once filed with the city a statement of the account due the State for said water main, and failing to receive payment as stipulated in the contract with the Board of Water Works Trustees of the city of Fort Wayne, the account was placed in the hands of the Attorney-General of the State for collection, where the matter now rests.

With the exception of the Custodial Cottage for Boys, all permanent improvements for which the last General Assembly granted us specific appropriations, have been completed. The appropriation for the Custodial Cottage for Boys was not available until November 1, 1905, and this delayed the construction work until the spring of the present year. However, the building is under roof and inclosed, and we expect to have it completed and ready for occupancy by May 1 of next year.

The Board of Trustees asked of and was granted by the last General Assembly the sum of $8,000 for improvement to our heating and power plant; the improvement to consist of three one hundred and fifty (150) H. P. high pressure boilers and an addition of twenty-five (25′) feet to our old brick stack. It was the plan of the Board to use nothing but high pressure steam for both heating and power purposes, and to arrange the boiler plant so as to connect with the new boilers the one one hundred and twenty-five (125) H. P. high pressure boiler installed in 1891, as well as the new one hundred and twenty-five (125) H. P. high pressure boiler which was installed in 1903. It was found, however, much to our regret, that the old boiler known as Boiler No. 5, which had been installed in 1891, was in such bad condition and so nearly worn out that it could not be placed in the battery of new boilers. This necessitated the rearrangement of our requirements and an additional one hundred and fifty (150) H. P. high pressure boiler. We also found that the addition of twenty-five feet (25′) to the old brick stack would not give us sufficient stack capacity for the rearranged plant, and that it would be necessary for us to build a new brick stack seven feet (7′) in diameter by one hundred and twenty-five feet (125′) high to properly care for our new boiler equipment. The appropriation of $8,000 was insufficient to meet the additional cost of a new one hundred and fifty (150) H. P. high pressure

boiler and a new brick stack and the Board came to you for relief. You advanced to us out of the Governor's Emergency Contingent Fund for this purpose $2,892.01, and we are pleased to state that the rearranged plan was followed out and completed.

A complete statement of the regular and specific appropriations made by the last General Assembly and the disbursement of the same for the fiscal year ending October 31, 1906, is as follows:

MAINTENANCE.

Regular appropriation	$122,000 00	
Excess on 30.108 inmates over 1,000	2,910 25	
Expenditures		$124,909 36
Covered into State Treasury unused		89
	$124,910 25	$124,910 25

REPAIRS.

Regular appropriation	$6,000 00	
Expenditures		$6,000 00
	$6,000 00	$6,000 00

CUSTODIAL COTTAGE FOR BOYS.

Appropriation (available Nov. 1, 1905)	$50,000 00	
Expenditures for fiscal year ending October 31, 1906		$25,608 81
Balance in fund		24,391 19
	$50,000 00	$50,000 00

NEW KITCHEN AND DINING ROOM, COLONY FARM.

Appropriation	$9,000 00	
Expenditures for fiscal year ending October 31, 1905		$3,905 62
Expenditures for fiscal year ending October 31, 1906		4,094 04
Covered into State Treasury unused		1,000 34
	$9,000 00	$9,000 00

ADDITION TO LAUNDRY AND MACHINERY.

Appropriation	$5,000 00	
Expenditures for fiscal year ending October 31, 1905		$4,269 31
Expenditures for fiscal year ending October 31, 1906		350 95
Covered into State Treasury unused		379 74
	$5,000 00	$5,000 00

HEATING HOSPITAL BUILDING.

Appropriation	$3,500 00	
Expenditures for fiscal year ending October 31, 1905		$1,465 87
Expenditures for fiscal year ending October 31, 1906		948 30
Covered into State Treasury unused		1,085 83
	$3,500 00	$3,500 00

IMPROVEMENT TO HEATING AND POWER PLANT.

Appropriation	$8,000 00	
Expenditures for fiscal year ending October 31, 1905		$7,673 21
Expenditures for fiscal year ending October 31, 1906		326 79
	$8,000 00	$8,000 00

PAINTING.

Appropriation	$3,000 00	
Expenditures for fiscal year ending October 31, 1905		$1,413 10
Expenditures for fiscal year ending October 31, 1906		1,586 90
	$3,000 00	$3,000 00

FIRE PROTECTION, MAIN BUILDING, COLONY FARM.

Appropriation	$3,000 00	
Expenditures for fiscal year ending October 31, 1905		$2,246 11
Expenditures for fiscal year ending October 31, 1906		750 00
Covered into State Treasury unused		3 89
	$3,000 00	$3,000 00

In addition to the foregoing funds, the following amounts have come into the hands of the Treasurer of the Board:

GOVERNOR'S EMERGENCY CONTINGENT FUND FOR FINISHING IMPROVEMENT TO HEATING AND POWER PLANT.

Appropriation	$2,892 01	
Expenditures for fiscal year ending October 31, 1906		$2,892 01
	$2,892 01	$2,892 01

TUITION RECEIPTS AND INDUSTRIAL PROCEEDS AND EARNINGS.

Receipts from tuition accounts	$3,364 50	
Industrial proceeds and earnings	570 72	
Deposited with State		$3,935 22
	$3,935 22	$3,935 22

NEEDS OF THE INSTITUTION.

REGULAR APPROPRIATIONS—MAINTENANCE.

Although most of the supplies chargeable to the Maintenance Fund have materially increased in cost during the past two years, yet we believe, with the strictest economy, we will be able to meet our expenses with a maintenance appropriation of $122,000 based on 1,000 inmates present, with an additional allowance of $122 per inmate per annum for all above 1,000 inmates actually present. We find from the experience of the past two years that we can not, with safety, expect to maintain the Institution at a less actual cost than $122 per inmate per annum, and we would therefore urgently request that the excess allowance remain at this figure.

REPAIRS.

The age of a number of our buildings necessitates constant repairs, and several important roof renewals as well as tile floor repairs are needed at this time to keep our buildings in proper condition. We believe the Repair Fund for the next biennial period should be $7,500 per annum.

PAINTING.

With the increase of the number of buildings, more inside and outside painting becomes necessary each year. That this may be done promptly as needed, we believe the appropriation for this fund for the next biennial period should be $2,000 per annum.

SPECIFIC APPROPRIATIONS—FARM LAND.

We find the acreage of Colony Farm wholly inadequate for our needs. Our farming operations are seriously handicapped for want of more land. The acreage now owned by the State does not nearly furnish the provender required to maintain the stock we now have on hand, nor will it furnish employment for the able-bodied boys who will occupy the Colony buildings as soon as the low-grade boys are removed to the Custodial Cottage, now in

process of completion. With the growth of the Institution, we find it necessary to increase our herd so that we can secure the required amount of milk. We need more land for pasture for the herd, and with the addition of 250 acres to the State's present holdings, we would be able to raise all the provender required to maintain the stock. With this additional acreage we can operate the farm much more economically and save the State a large amount now expended for feed that should be raised on our own ground. At this time we are in a position to purchase land adjoining the State's holdings at a reasonable price, which we would not be able to do in the future, as land values near the city of Fort Wayne are rapidly increasing with the growth of the city. The farm of 97 acres immediately adjoining the State's farm on the north, and now under lease by the State, can be purchased for $10,500, and unless it is purchased at this time, the owner of the land declines to re-lease it to the State, but will sell it to private parties, and thus make it impossible of purchase at this reasonable figure. There is also a parcel of land adjacent to the east and north of the State's holdings containing 160 acres, of which 120 acres are available for farming operations and 40 acres for woodland and pasture, which we believe can be purchased for $20,000. We urgently request the appropriation of $30,500 for the purpose of purchasing this additional farm land.

FARM DRAINAGE.

Much of our farm land is in need of drainage. Our maintenance fund is inadequate for this purpose, and we would request an appropriation of $1,000 to be used for tile drainage.

TILE FLOORS AND IRON STAIRWAY, MAIN BUILDINGS, COLONY FARM.

The present cement floor in the dining-room and scullery of this building is worn and unsightly as well as unsanitary. On account of its constant use, a substantial tile floor should replace the present cement floor. The cement floor in the hall of the south wing, known as "Spangler Wing," is badly worn and unsightly and should be replaced with a substantial tile floor. The stairway in this wing is of wood, cheaply constructed, and should be replaced

with a substantial plain iron stairway. For the purpose of making this improvement to the main building, an appropriation of $2,700 is requested.

ADDITION TO CUSTODIAL COTTAGE FOR GIRLS.

The present dining-room and kitchen for this building are temporary quarters, small and inadequate for the purpose for which they are used. When this building was originally constructed, it was planned that an addition should be built for a dining-room and kitchen. The present arrangement is very unsatisfactory and inconvenient as well as crowded. The rooms now used as a dining-room and kitchen should be occupied as day rooms, thus increasing the capacity of this building. For the purpose of properly caring for the 150 low-grade girls now housed in this building, a new dining-room 50x40 feet should be constructed, with a dormitory on second floor and a scullery and kitchen, one story, 20x30 feet, in the rear. The wood floor in the center hall of the main building should be replaced with a suitable tile floor. The present wood staircase should be replaced with a plain, substantial iron staircase. We request these latter improvements on account of their constant use and in order to reduce the fire hazard. The porches on the south and west sides of the present building should be enlarged and new floors laid. With the additional dormitory above the dining-room, this building would accommodate 40 more girls, bringing its total capacity up to 190 inmates. For the purpose of making these improvements we would recommend an appropriation of $21,000.

ADDITIONAL ELECTRICAL APPARATUS.

We find that our present lighting equipment is inadequate. We will not be able to furnish light for the new Custodial Cottage for Boys without additional apparatus. By the installation of multiphase type generators and motors, we could centralize our power-producing machinery on a most economical basis and discontinue the use of the steam engine in the laundry and the gasoline engine at Colony Farm, now used for pumping water and cutting feed. This new equipment would also furnish power for operating blast fans in the different buildings, in connection with their ventilation,

as well as operating machinery in the industrial building. This equipment can be installed without enlargement of the building now in use. For the purpose of making this change we would ask for an appropriation of $6,000.

HIGH-PRESSURE PUMP.

The present high-pressure pump has done constant duty for fifteen years and is worn out and a source of great expense to keep in repair. A new high-pressure pump for furnishing water for domestic purposes throughout the buildings should be installed. We would ask for this purpose an appropriation of $1,200.

FIRE PROTECTION AND EXTENSION OF WATER MAINS ON INSTITUTION GROUNDS.

The new Custodial Cottage for Boys now in process of completion and the Custodial Cottage for Adult Females are both located outside the range of fire protection by our city water mains distributed over the Institution grounds. These water mains should be run over in front of each of the buildings so as to give them full fire protection. Standpipe connections should be made with these mains in both buildings, with hose stations conveniently located on each floor. For the purpose of extending these water mains and equipping standpipes, we respectfully ask for an appropriation of $4,000.

CEMENT WALKS AND FLOORS.

Cement walks are needed in front of the main Institution building running from the school building to the Custodial Cottage for Boys, also from front entrance of main building to front gate on Griswold avenue, and from the hospital to Custodial Cottage for Adult Females, and thence to the Custodial Cottage for Girls, thence to the rear center of main building and in front of the Industrial building. The basement of the Custodial Cottage for Adult Females and the Custodial Cottage for Girls should have cement floors. For the purpose of making these improvements we would respectfully ask for an appropriation of $5,000.

PLASTERING CUSTODIAL COTTAGE FOR BOYS.

The original plans and specifications for this building did not contemplate the plastering of the walls, but since the building has been constructed, we have found the brick walls too rough and uneven for a painted surface. The appropriation made by the last General Assembly is not sufficient to take care of the additional cost of plastering this building, and we would therefore request an appropriation for this purpose of $4,300.

A recapitulation of the above mentioned specific appropriations, with the estimated cost of same, is as follows:

Farm land	$30,500
Farm drainage	1,000
Tile floors, main building, Colony Farm	2,700
Addition to Custodial Cottage for Girls	21,000
Electrical equipment	6,000
High-pressure pump	1,200
Extension of water mains on Institution grounds	4,000
Cement walks and floors	5,000
Plastering Custodial Cottage for Boys	4,300
Total	$75,700

In closing this report we wish to heartily commend the untiring efforts of the Superintendent, and to acknowledge and thank you for the encouragement, advice and help you have so generously given us in our desire to make this Institution of the greatest benefit to the State and to the afflicted ones who come under its care.

Respectfully submitted,

JAMES W. SALE,
EDWARD M. WILSON,
MARY R. HARPER,
Trustees.

Fort Wayne, Indiana, October 31, 1906.

REPORT OF SUPERINTENDENT.

To the Board of Trustees:

I have the honor to submit herewith the twenty-eighth annual report of the Indiana School for Feeble-Minded Youth for the fiscal year ending October 31, 1906:

MOVEMENT OF POPULATION.

	Male.	Female.	Total.
Present, beginning of period included in report	471	565	1,036
Absent on leave, beginning of period included in report	3	....	3
Total enrolled	474	565	1,039
Present ending of	457	566	1,023
Absent on leave	8	4	12
Total enrolled	465	570	1,035
Admitted during period included in report (not including those returned from furlough)	23	19	42
Discharged	1	1	2
Withdrawn	20	6	26
Died	11	7	18
Daily average actually present	455.402	561.967	1,017.369

	Boys.	Girls.	Adults.	Total.
Applications presented	38	32	20	90
Applications accepted pending room	24	23	13	60
Applications deferred	6	2	3	11
Applications rejected	8	7	4	19
Applications completed not acted upon	2	3	1	6
Total applications on file accepted pending room	24	26	10	60
Inmates discharged	1	1	..	2
Inmates withdrawn	20	6	..	26

Of 90 applications presented to you for consideration, 60 were accepted pending room. Action was deferred on 11, and 19 were rejected. Completed applications on file to be presented at the next regular meeting of your Board are boys, 2; girls, 3; adult females, 1; total, 6. Total applications on file accepted pending room for boys, 24; girls, 26; adult females, 10; total, 60. One boy was discharged as not mentally deficient and one girl was dis-

charged as insane. The children withdrawn were taken out by their parents or legal guardians. Some of them were persons over whom the State should have had the right of permanent supervision, but with our present laws the parent or person placing a child in the Institution can withdraw such child without formality of law and regardless of its condition. The statutes concerning admission of children under sixteen years of age should be changed from the old form of admission on voluntary application of the legal guardian to a commitment by the Circuit Court of the county where such child resides, so that when the pupil is received into the Institution the Board of Trustees become legal guardian with authority to pass upon all requests for withdrawal. The statutes should also be changed to define more clearly the class and type of defectives that shall be cared for by this Institution. The law now says (Sec. 3, Act of 1887): "The purpose of this Institution shall be to care for, support, train and instruct feeble-minded children, the term feeble-minded to include idiotic, epileptic and paralytic children." The two classes last mentioned should be stricken out, as a paralytic uncomplicated ought never be consigned to an institution for mental defectives, and with the new Village for Epileptics recently established there is no sound reason why this Institution should attempt to care for a class when facilities far beyond our reach have been arranged elsewhere.

With the large number of applications for girls that are now on file and others that will be presented within the next two years, it would be unwise to put off longer the arranging of quarters for at least a part of these. The solving of the question of the future of this class of defectives must of necessity be worked out in the State's institutions, and the accomplishment of this task depends very largely upon the age of the individual at the time State supervision begins. It is necessary, therefore, that we build generously, in order that worthy cases may be accepted promptly and before there has been an opportunity to assist in increasing our already too large a population of defectives.

I would recommend for your consideration the construction of an addition to the building known as the Custodial Cottage for Girls. While this building has been in use several years, it was never fully completed, the dining-room and kitchen occupying

temporary quarters. By adding a dining-room and kitchen to the present buildings, using the floor above the dining-room as a dormitory and remodeling the present dining-room and kitchen so that they will be suitable for day rooms, we could accommodate forty additional girls. While this improvement is being made, it would be well to make some changes in the present building by enlarging the verandas on the south and west sides and finishing them with tile floors. With the completion of the Custodial Cottage for Boys, all applications for males that have been accepted pending room, can be received and new applicants can be cared for without delay. In order that you may have a more correct idea concerning our present condition as regards the caring of inmates, I give below the distribution of population, together with the number of beds in each department.

DISTRIBUTION OF POPULATION.

	Enrolled.	Beds.
Main building—Girls	287	287
Main building—Boys	269	261
Cottage for Custodial Girls	150	156
Cottage for Adult Females	133	123
Cottage, Colony Farm Boys	179	185
Nursery Department Hospital—Boys	17	16
Total	1,035	1,028

THE SCHOOL DEPARTMENT.

This is the "trying out" field, and every child taken into our Home whose mental and physical condition will permit is privileged to the school test that is to determine his place and position in the Institution. He is given the benefit of every doubt. It is a slow process, in some instances covering a period of several years, but the teacher, realizing the sacredness of the duties devolving upon her, will not relinquish her hope in the child until every resource at her command has been exhausted. We have enrolled in our school department at this time 401 children; all available space is being utilized. Rooms have been fitted up in the basement of the schoolhouse for the sloyd and clay modeling classes, and one room in the Girls' Department (west wing) is being used for school purposes. The remodeling of the present building or the erection of a new schoolhouse must be considered in the near

future. Our present facilities are inadequate, and with the incoming of additional pupils that will follow the opening of our building now nearing completion, the problem of properly caring for this increased number will be one for serious consideration. The progress made in the schools since the adoption of a practical educational plan has been truly marvelous. The change has not been in the work of the child alone but in the child itself. His conduct in the day room, shops and on the playgrounds tells of a school system that is influencing for good in the building of character and establishment of a due respect for the rights of others. The corps of teachers, with three exceptions, remains the same as reported last year. Mrs. Fannie B. Pace, who had charge of the fancy needlework class for several years, resigned to become principal of the school at the Missouri Colony for Epileptic and Feeble-Minded Children. Misses Voris and Lipinski resigned to take up work in the public schools. The vacancies have been filled by competent teachers, who have entered upon their duties with a determination to maintain the high standard already attained by their respective departments. Prof. Cyrus D. Mead was reappointed as principal on July 1st. His work has been characterized by efficient and unselfish devotion to duty that is most commendable. The arrangement of classes and the outline of study for the coming year will be found in the report of the principal, to which your attention is respectfully directed.

MEDICAL DEPARTMENT.

While the mortality rate has been exceptionally low, the department has had the usual number of minor ailments with which to contend. We have been free from epidemics of a serious nature; three cases of typhoid fever have been reported; the source of infection is unknown. Samples of water from the Colony Farm and the main Institution grounds were sent to the State Laboratory of Hygiene for chemical analysis. The report received from the department shows our water supply to be pure and not responsible for the trouble. The number of deaths for the year was boys, 12; girls, 6; total, 18, or 1.86 per cent. The number of hospital cases cared for was boys, 595; girls, 585; total, 1,180. The total number of dispensary cases was 10,400. The improvements begun in

the department last year in the installation of the new steam heating system and a complete remodeling of the ventilation throughout the building, which has just been finished, together with the placing of new fixtures in the operating room and girls' lavatory, have added greatly to the comfort, convenience and cleanliness of the building. The hospital department was in charge of B. Van Sweringen, M. D., a member of our regular consulting staff, from November 1st to December 1st, at which time Dr. Charles G. Beall, the newly appointed Resident Physician, arrived and assumed charge of the department. Dr. Chester E. Hull, of the class of 1906, Indiana Medical College, was appointed as interne to serve one year. Dr. Howard R. Raper, of the class of 1906, Indiana Dental College, was appointed as dental interne. Reference to the work of the dental interne will be found in the physician's report. The members of our consulting staff remain as reported last year. Their suggestions and assistance in carrying on the medical work of the Institution have been invaluable.

The management of the hospital under Dr. Beall has been most satisfactory. While he has been handicapped by lack of proper accommodations for the caring for certain diseases, he has carried on the work in a most efficient manner. Your attention is respectfully directed to the Resident Physician's report appended hereto.

INDUSTRIES.

There have been no additions to our industries the past year. They remain as follows: Shoemaking, tailoring, mattressmaking, broom-making, woodworking, carpentering, painting, brickmaking, sewing, mending and comfort-making, bakery, laundry, gardening, farming and dairy. All of the brick used in the construction of the new Custodial Cottage for Boys was made on our own yard by the boys, with the usual number of paid employes. There was used in this building more than a million brick, the actual cost outlay to the State being $1.98 per thousand. Detailed report of the work done by the different departments will be found elsewhere.

COLONY FARM.

This has been a fairly successful season. While some of the crops, principally clover and wheat, were short, there was an average yield from most of our fields. While in the raising of stock

we have been more fortunate than usual, the increase in every department has been substantial, as will be seen by the stock report taken from our annual inventory. The productiveness of our farm could be greatly increased by the proper distribution of drain tile. The natural drainage is very poor and artificial drainage has only been put in a few of the fields. This does not call for a large expenditure of money, yet it can not be done out of our Maintenance Fund.

I desire to call your attention to the necessity of having more land with which to carry on the farming operations of the Institution. With the amount of land we now hold it is not possible to raise sufficient provender with which to feed our stock. With the increase in our dairy herd and swine we should add to our present holdings not less than 250 acres of good farming and woodland. This should be contiguous to our present farm, in order that it may be under the supervision of one farm manager. Another reason for the purchase of more land is to furnish employment for a larger number of our able-bodied inmates. About one-third of the population at Colony Building belong to the lower custodial grade and will be removed from Colony to the new Custodial Cottage for Boys next spring. These boys do not assist in the work of the farm, but their places will be taken by the higher grade able-bodied boys, whose labor will be valuable to the Institution as well as themselves, if they are furnished active and healthful employment.

STOCK INVENTORY, COLONY FARM.

Milk cows	47
Heifers	17

RELIGIOUS EXERCISES.

The usual chapel services are held each Sabbath in the main auditorium, as well as in the different detached cottages. All special days are observed with appropriate services.

RECREATION AND AMUSEMENTS.

This is a part of our work that is never neglected. We are continually striving for new features that will amuse and inspire in the child a desire to enter into the sport or play of his associates. During the winter months, evening entertainments, dances and birthday parties are given. These inside amusements continue until the pleasanter spring days appear or until recreations and pastimes are planned outside the buildings. All of our brighter and middle-grade children, both boys and girls, were given an outing at the camp during the summer.

Our Boys' Band and Girls' Orchestra are under the direction of competent leaders, and have made marked progress the past year. The Girls' Orchestra furnished a part of the musical program at the meeting of the State Conference of Charities and Correction held at Muncie.

MAINTENANCE.

It is becoming more and more difficult to keep inside our exceedingly low maintenance appropriation. Supplies of all kinds and the cost of help have increased in value from year to year, while our maintenance appropriation has been based upon a sliding scale, decreasing our income.

I would suggest that we be given a maintenance appropriation of $122,000 per annum, based upon an actual attendance of 1,000 inmates, with an excess allowance of $122 per capita per annum for each inmate over that number. Our excess maintenance for the past year amounted to $2,910.25, making the total maintenance available, $124,910.25. Our expenditures for all purposes except repairs and improvements was $124,909.36, making the net per capita cost for the year, $122.77.

REPAIRS.

It has not been possible to make all repairs needed because of an insufficient repair fund. The more urgent needs have been cared for, but many things we were compelled to postpone.

I would again ask for an increase in this fund, that repairs may be made promptly when occasion demands.

SPECIFIC APPROPRIATIONS.

The new kitchen and dining-room building at Colony Farm has been completed and in use about eight months. All the wooden structures in the rear of the main building have been removed, the grounds graded and cement walks put down. With a few changes in the main building our property at the Colony will be in excellent condition. The buildings have been equipped with a 500-gallon stationary chemical fire engine of the American La France type, with eight stations so distributed over the building that every department is amply protected. A watchman's clock system has been installed and connected with our register at the main Institution. The changes in the heating and ventilating at the hospital have been finished; the addition to the laundry building and installation of new equipment gives us ample facilities for our present needs. Our boiler house and power plant has had a complete overhauling. The old low-pressure boilers have been replaced by four 150 H. P. high-pressure boilers. One of the old 125 H. P. boilers was reset and is being used to heat water for house purposes. A 500 H. P. open feed-water heater has been installed for boiler purposes, and a radial hollow brick chimney seven feet in diameter by 125 feet high takes the place of the small chimney, which was found of insufficient area to give proper draft for the new boiler equipment.

The new Custodial Cottage for Boys is nearing completion and when finished will compare favorably in construction and plan with the best buildings on the grounds. The appropriation for painting has been exhausted. A fund for that purpose should be a part of our regular appropriation in order that all buildings may be kept clean and in a sanitary and healthful condition.

OUR NEEDS.

Our farming operations are handicapped for want of sufficient land to carry on the work economically. The acreage now owned by the State does not furnish enough provender to maintain the stock we have on hand, nor furnish employment for the available able-bodied boys that we desire to place at the Colony. We should have not less than 250 acres in addition to our present holdings. The farm land is in need of a thorough system of drainage. This should be done early next spring.

The floors in the dining-room and some of the halls on the first floor of the Colony building need replacing. I would recommend the use of tile to take the place of cement and wood.

For the purpose of increasing our capacity in caring for girls and completing the building known as the Custodial Cottage for Girls, a dining-room and kitchen should be added to the present building, the second floor above the dining-room to be used as a dormitory, the rooms now being used as temporary dining-room and kitchen to be remodeled and used as day rooms. This would give additional room for forty girls. The porches on the south and west sides of old building should be enlarged and tile floors put in.

The main auditorium (or chapel) is not large enough to furnish seating room for all children who could attend. A gallery placed across the rear of the room would give ample accommodations. Cement walks are needed between the different buildings and from the front entrance of the Administration building to the street. Also cement floors in the Custodial Cottage for Girls and Cottage for Adult Females. We will not be able to furnish light for our new Cottage for Boys with the present equipment. By the installation of multiphase type generators and motors, the steam engine used in the laundry and gasoline engine used at Colony Farm for pumping water and running feed cutters could be done away with and our power-producing machinery centralized. Motors are now used for operating machinery in the Industrial building and blast fans in the Custodial Cottage for Girls. The new equipment would take care of all these, besides light for all the buildings and grounds. A new high-pressure pump for furnishing water throughout the buildings should be installed, this to replace a

pump that has done constant duty since the establishment of the Institution. The additional machinery can be installed without any alteration or enlargement of the building now in use.

The usual appropriation for painting should be continued. That there may be no delay in making repairs to our buildings, I would respectfully ask that the Repair Fund be increased to $7,500 per annum. All brick required for the improvements requested will be furnished from our own yards.

CHANGES IN ADMINISTRATION.

Miss Jennie Battershall, who was connected with the Institution for eighteen years and serving as Matron the past three years, resigned on September 15, 1906, to take a much-needed rest. She was conscientious, loyal and indefatigable in the discharge of the many and arduous duties that devolved upon her. She gave the best years of her life to the work of the Institution, always cheerful, never complaining, ever striving to smooth the path or make more joyous the lives of those she had labored for so long. Miss Nora Griffin was appointed Acting Matron, to serve until a permanent appointment is made.

Mr. William H. Scheiman, who filled the position of clerk for two years, resigned on August 17, 1906. Mr. John A. Ross, of Indianapolis, was appointed to fill the vacancy.

LOSS BY FIRE.

Our horse barn on the main Institution grounds was partially destroyed on November 15, 1905. Fire was discovered by the watchman while making his midnight inspection of detached buildings. The alarm was sounded and the Institution Fire Brigade responded promptly, but the flames were soon beyond our control. The timely arrival of the Fort Wayne City Fire Department, under Fire Chief Henry Hilbrecht, saved us from having a serious loss. The fire was confined to the upper part of the building, the contents of the mow and roof being totally destroyed. The damage to the building and contents as adjusted by the insurance companies was $1,665.83, which amount was collected and turned into the general fund of the State. The building was repaired without delay at a cost of $991.17 from our General Repair Fund.

SPECIAL MENTION.

On December 3, 1905, we were honored by a visit from members of the British Royal Commission on the care and control of the feeble-minded, the commission being represented by William Patrick Byrne, Esq., C. B., Willoughby Hyett Dickinson, Esq., Mrs. Ellen Francis Pinsent, Horatio Bryan Donkin, Esq., M. D., and James Crawford Dunlap, Esq., M. D. The purpose of the commission's visit to America was to study existing methods in caring for feeble-minded, epileptic and other defective classes.

IN CONCLUSION.

I desire to thus publicly express my appreciation for the loyal and efficient support of my co-workers in every department. They have never failed me, and to them belongs the credit for whatever of success has been achieved. I heartily commend them to you as worthy of serving a great State in one of her noblest undertakings.

And to you I feel doubly grateful. Your advice and counsel has been most helpful and the deep interest manifested by each member of the Board in every phase of the work has been an incentive to greater and better things.

Respectfully submitted,

ALBERT E. CARROLL,
Superintendent.

REPORT OF SCHOOL PRINCIPAL.

To the Superintendent:

The School Department respectfully submits its annual report for the year ending October 31, 1906. It creates a pardonable pride to see the teacher's enthusiasm swell at the way her pupils "retain" from last year. The credit is hers; it simply bespeaks a thoroughness in her method that obtained to a high degree last winter. Nothing has been sacrificed, no one has been pushed aside, school has "kept" continually and the children have enjoyed themselves to the fullest extent. Our enrollment consists of 401.

GENERAL SCHOOL WORK.

Our schools afford the mentally deficient child of the State the same training and advantages open to the children of the public schools. In fact, we might say more, for in addition to the school of letters and manual instruction; in addition to special gymnastic exercises, voice and piano training, band, and orchestra lessons, at least twelve different kinds of industrial work are taught in the shops of the Institution at large. In school the same text is used, the same teacher is employed, and the same system and routine is followed. The difference is one of degree more than kind. It is more intensive, less extensive. Instead of the "head and heart and hand," it is the "hand and heart and head" order. It is not to be inferred, however, that primary and intermediate courses are third in importance and results.

The schools change at the noon hour, allowing for each a half day at work and a half day at school. The slower children come in the forenoon, the brighter in the afternoon. The morning school continues to progress, considering of course the difference in the child, at a more noticeable rate than the afternoon. The teacher prides herself as much with these slower ones as with her brighter classes. They share along with the afternoon pupils some of the new material and many of the new ideas. The special day is theirs the same as for the others.

The afternoon boys and girls will accomplish nearly as much as the public school grade children, but in a somewhat longer time. It is our aim at all times to keep in touch with the newer educational ideas as they appear, so that our children may enjoy exactly the same advantages as those of the public schools. New material and apparatus is being added each year. We hope this winter to place new maps and globes in all the upper rooms. The new book in English and the new physiology (both Indiana series) have supplanted the old ones.

THE KINDERGARTEN.

The mission of the kindergarten is fulfilled in our particular kind of school if it were never in vogue elsewhere. Action to a mind slow to perceive; construction to a hand enfeebled; an appeal to the fancy and imagination of a child of arrested growth, is sounder doctrine in pedagogy than is the same applied to the normal condition. Our children act the squirrel, the bird, the worm and butterfly, the shoemaker, and the blacksmith; they cut and form, sew and color the tree, the fruit, the birdhouse; they listen to the tale of the "three bears," "the gingerbread man," and "Roly-Poly," around the kindergarten circle. There would be no seat for him or her outside, but here they enjoy all the privileges and pleasures allotted to the normal child. Our kindergarten (exclusive) is now all with one teacher, in one room, and is truly a kindergarten.

THE GRADE.

But the larger world presents itself. The time arrives when the childish things must be laid aside, and that at not too old an age. The kindergartner enters the grade and forms his letters, sounds his letters, reads and writes them. Here, and with number work, his action play is drawn upon again. His walk-run-hop words are actually walked, run, and hopped. His ball-apple-top words are felt, thrown, and placed. His 1-2-3 and 4 are not at first in chalk and pencil, but grains of corn, cubes of cardboard, colored pegs, objects about the room, or imitation sweets.

He is not "instructed" in nature, he is shown it. He should never "think" it, but he should be led to "feel" it. Some excellent results followed last year. A deeply seated lesson crept

through the whole Institution life last spring by the placing and guarding of bird boxes drawn and constructed by the boys. It created respect and sympathy and love for the life of the bird and animal, and even the flower. Before this, he would tear down the nest; now he shields it. Two years ago he fought the bird; now he will fight for him.

The boys are carried to the fourth and fifth grade, the girls to the sixth and seventh. History, geography, composition, and physiology enter at their proper places.

MANUAL AND ART.

Thus far it has been mostly the "head and heart"; the hand now applies itself. It is still activity, but in a more tangible form. A realization of the power to "do," a hope enkindled by a creation in clay or wood, linen or water color, growing before the eye, awakens a pride, and a tangible result here stimulates him to further effort at his books. It cultivates neatness, insists on accuracy, demands application, develops originality, and affords a pleasure. One hundred and fifty-two pupils receive some form of manual or art work. To some this is given as a reward, but to the majority as regular school work.

In wood, a mechanical drawing precedes the object constructed. Several boys are promoted to the bench where larger and more practical things will be made with a view of supplying the schoolrooms. In clay, the girls work from the natural forms of flowers, foliage, vegetables, fruit, and animals, when obtainable, otherwise from casts. More advanced pupils model from casts the more difficult objects, as medallions, heads and busts, while some figure poses from life are done. In the primary class the holidays and seasons are observed by illustrating in clay the story of Hiawatha, the Puritans' Thanksgiving, Santa Claus, the Eskimos, etc. Casts will be used for decorating our rooms.

In art studies, nature predominates in the washes and pencils of the earliest blossoms of spring, to the seedpod and glowing colors of autumn. Outdoor sketching brings the seasons in all their beauty to the classes. It makes the study of the bird, flower and insect in the room more intelligent. Oil as a medium will be used this coming winter. Oriental art and textures will be

studied. Simple pieces in water color will be passed through the rooms to be placed on the walls.

In fancy needlework, our usual drawn, eyelet, embroidery, Hardanger, raffia, and lace work will be continued. In addition, we will have designs in rug weaving, hanging baskets, and flower-pot covers in reed suitable for schoolroom use. This coming winter will let us hemstitch and monogram much practical and useful linen for the Institution. In embroideries, cut work, Hedebo, Biedermaier, Montmellick, cross-stitch, and shadow work will be introduced.

MUSIC AND PHYSICAL.

The "better self" is not overlooked. There is a "soul" training. The leaven that permeates the furthest Institution corner is the music, voice, piano, orchestra, and band. The greater part of five hundred help in general singing. From eighty to one hundred are given special instruction in male quartets, four part mixed choruses, girls' part singing, etc. The number at piano is more than ever before. A yearly recital is given in voice and piano. The girls' orchestra of twelve pieces leads in Sunday Chapel and is heard at the different cottages during the year. The boys' band brightens our Sunday mornings by music on the lawns. The Institution feels a pride in both of them.

In all our work above, one must not presume the normal body. A physical deficiency generally accompanies a mental inertness. From the time he enters to the time he leaves school a certain period daily is devoted to systematic physical work. Courage and confidence, traits lacking, are instilled. Better muscular control should mean a better step and a straighter line, and what is not improbable, better writing in school. An idea of the care of the body will supplement the work. The classes are larger than ever before. We are badly in need of an extension of the schoolhouse to allow a well-equipped gymnasium, as well as to meet the crowded condition of the schoolrooms.

EXHIBIT WORK.

Our Chapel in June was never prettier with display work, including articles from each of the industrial departments. The better part was taken to the State Fair exhibit at Indianapolis

and displayed along with school and industrial work from each of the State institutions and public school. Many thousand people handled the various articles made in our shops and industries. The kindergarten house, which was furnished by the children, was a center of attraction to old as well as young. Manuscripts of the primary and upper grades and the mounted grains, leaves, flowers, and nature papers passed as public school work. The fancy linen, lace, and Hardanger received many compliments, as did the casts in clay and constructions in wood. The studies of features, landscapes, and of our fruits and vegetables, flowers, and common birds, would hardly be accepted as coming from our schools. It offered the people of the State a splendid opportunity of seeing what was being done.

THE COMING YEAR.

The study of bird life was so successful and of such value last spring that it will lead in our nature work this coming year. Our pupils are looking forward to having some of their material chosen by the State Superintendent for the next Bird and Arbor Day Annual. Our aquariums are restocked, our rooms filled with flowers and nature, the schoolhouse is cleaner than many of the best. The nature collections will continue, the school garden also. We will attempt in the upper grades, an accurate record of the daily length of the sun's shadow, and some experimental work in physiology. For the first time, each teacher has her room both with morning and afternoon schools. We feel perfectly confident of making the coming year the best in our history.

The kindergarten begins with a number of new children. Many have never known a mother's love. The home will be carried to them. A complete set of dishes and glass they will have for their own. Monthly lunches will be served from white linen. They must learn "manners" along with their "colors."

In primary and grade, the phonic method in reading has been especially successful. It will be extended. Silent reading for better expression will make better readers. A booklet showing the writing of each child monthly, together with one which records his deportment, will be kept at the school office. The upper girls will read "Midsummer Night's Dream" and dramatize it. The story

of Hiawatha will be seen Thanksgiving as conceived by kindergarten, grade, clay modeling, and art classes.

Pottery will be made by the more advanced modeling girls. The Institution in miniature will be set in clay. Perspective drawings of the grounds and buildings, together with the story in water color of the trees in their seasons, have been considered. The bench boys will attempt music and book racks in oak.

The winter has many good things in store for the children. The circuses have passed, camp has closed, but nutting is in season, dances and birthday parties are near at hand, bi-weekly entertainments have begun, Arbor and Bird Day was celebrated, Harvest Home, Halloween, Thanksgiving, Christmas, Washington's birthday, Easter, Decoration Day, and the "Fourth" are on the Institution calendar. An overhauling of our children's library should not be far off, also a reading-room for the various buildings. An employes' library should be encouraged. A small printing press with which to issue our weekly bulletins would be of great value.

A regularity in attendance, a liberality in material, a sympathy and co-operation from the supervisor of boys and supevisoress of girls starts the year encouragingly. The teachers are enthusiastic, and filled with new ideas. They have rubbed up against their fellows and imbibed of other sources. Their calling is strenuous. Their work is a noble one. They have all they can do. They give their best to the demands of a great profession. Your confidence and esteem is highly prized. They will strive to merit it and repay you for your encouragements by the best school year.

Respectfully submitted,

CYRUS D. MEAD,
Principal.

REPORT OF RESIDENT PHYSICIAN.

Mr. A. E. Carroll, Superintendent:

The following is the report of the Medical Department for the fiscal year ending October 31, 1906:

The general health has been good. We have had two epidemics of minor importance, one of chicken-pox and one of whooping-cough. We are sorry to have to report three cases of typhoid fever, two from Colony Farm and one at the main building. Samples of water from both places were sent to the State Laboratory of Hygiene, and the report stated the water was good and in all probability not responsible for the cases of typhoid fever. Two papers of scientific interest have emanated from the department during the year, one on "Some Experience with Tuberculin," published in the Fort Wayne Journal Magazine, November, 1906. The other on "Heredity as a Cause of Dental Anomalies" (first prize essay), published in the "Dental Brief," October, 1906.

The admittances to the Hospital have been 585 girls and 595 boys. The dispensary cases numbered 10,400. Eight autopsies have been held during the year. The death rate for the year has been 1.86 per cent.

The medical library is being gradually increased by the addition of one volume a month. The regular repairs of the Hospital have been kept up and new plumbing in both ward bathrooms and in the operating-room has been installed. The members of our consulting staff have been of much service during the year, and we wish to express our thanks for their assistance and advice.

Below is appended a list of the more important medical and surgical cases and the mortality record.

Dr. Chester E. Hull, of the class 1906, Indiana Medical College, was appointed as interne to serve one year. He has been of much assistance in the general medical work of the Institution.

Dr. Howard R. Raper, of the class of 1906, Indiana Dental College, was appointed dental interne. The following is the work done by him while here:

Mouths examined	1,059
Mouths cleaned	792
Secondary teeth extracted	211
Primary teeth extracted	64
Roots extracted	113
Gold fillings inserted	10
Gutta percha fillings inserted	2
Cement fillings inserted	97
Amalgam fillings inserted	289
Compound cement amalgam fillings inserted	13
Compound gutta-percha amalgam fillings	13
Root canal fillings	12
Models of mouths made	51
Cases of regulation	1
Partial artificial, vulcanite denture	1

The necessity of a new hospital is becoming more manifest each year. The building which we now occupy can not with advantage have any additions made to it, while as it now stands it could be used very nicely for a cottage for inmates. The Hospital is crowded almost continually and we have no room whatever on the girls' side for isolation cases, the one room which we have being used for active tuberculus cases, and they must spend the greater part of their time with the nontuberculus. Again, the sick high-grade child must often be placed next to the sick lower-grade child, and this, to say the least, is not at all pleasant. We should also have a receiving ward in which the new inmates may be placed until the complete physical and mental examination is made, so they can be assigned to their proper divisions, and at the same time stop the spread of any contagious disease should it appear.

In conclusion, I wish to express my thanks and appreciation of the work done by the nurses and other hospital employes, as it is only by their co-operation that we have been able to accomplish what we have.

Respectfully submitted,

CHAS. G. BEALL,
Resident Physician.

AUGUSTA HOPKINS, Sewing Room, Cottage for Adult Females.
MRS. M. McLAUGHLIN, Sewing Room, Colony Farm.

REPORT OF BOARD OF TRUSTEES.

To the Honorable J. Frank Hanly, *Governor of Indiana:*

Sir—The Board of Trustees for the Indiana School for Feeble-Minded Youth respectfully submits its twenty-ninth annual report for the fiscal year ending September 30, 1907, together with a detailed report from the Superintendent, including various statistical exhibits covering the financial operations of the institution for the year.

Under an act of the sixty-fifth session of the General Assembly, the membership of our Board was increased from three to four, and acting under such authority, you appointed Mr. Albert P. Sinclair of Cloverdale, Putnam County, a trustee to serve for four years from May 6, 1907. The term of Mr. James W. Sale as a member of this Board having expired on March 10, 1907, you reappointed him for a term of four years from May 6, 1907.

At our regular meeting in May, the Board was reorganized as follows: James W. Sale, President; Albert P. Sinclair, Vice-President; Mary R. Harper, Secretary, and Edward M. Wilson, Treasurer. No changes in the executive force have been found necessary during the year. The Superintendent has made commendable progress along many lines, and has under his authority an excellent corps of assistants who co-operate with and support him in his arduous duties. The population and actual attendance of inmates follows closely that of last year. The death rate is slightly increased but is still very low, being 2.65 per cent of the population. The children have been healthy and well kept throughout the year. There is an air of contentment and cheerful compliance with the rules of the institution, alike among employes and inmates, that is gratifying to the Board.

The Superintendent's report shows that the full capacity of the institution has been utilized throughout the year,

while numbers of urgent applications, both children and adults, have been compelled to wait for room, which could only be made available by death or withdrawal. The Custodial Cottage for Boys, under construction at the time of our last report, was fully completed during the summer, but is not yet available for use as intended, for the reason that, on account of additions and repairs being made on the Custodial Cottage for Girls, as authorized by the last Legislature, it was necessary to temporarily house the inmates of that building in the boys' new cottage. We hope to have this work completed by January next, after which we will be able to care for all the male applicants now waiting. We can not, however, hope to care for all female applications, neither children nor adults, with our present capacity. Our repair fund has been well expended during the past year and the physical condition and appearance of the buildings have been much improved.

The addition of 160 acres of excellent farm land to our property during the past year will be a valuable asset to the institution, as it will enable us to extend our farm operations in a way that will undoubtedly be profitable to the State. This was the only specific appropriation made by the last General Assembly that was available during the fiscal year.

The steady growth of the institution has naturally increased the detail work of the Board, making it impossible to properly discharge our duties with a single meeting each month, so that it has been found advisable to hold two regular meetings each month, with a distinctive order of business for each meeting. This arrangement has proved very satisfactory, giving us opportunity for a thorough consideration of all of our work and more frequent inspections of the various departments of the institution.

A complete statement of the regular and specific appropriations made by the last General Assembly and the disbursement of the same for the period ending September 30, 1907, is as follows:

MAINTENANCE.

Regular appropriation	$122,000 00	
Excess on 28.162 inmates over 1,000	2,450 00	
Expenditures		$114,283 41
Reverted to State Treasury, 1/12 of appropriation		10,166 67

REPAIR FUND.

Regular appropriation	$6,000 00	
Expenditures		$5,500 00
Reverted to State Treasury, 1/12 of appropriation		500 00

CUSTODIAL COTTAGE FOR BOYS.

Appropriation	$50,000 00	
Expenditures for year ending October 31, 1906		$25,608 81
Expenditures for period ending September 30, 1907		24,391 19

ADDITIONAL CUSTODIAL COTTAGE FOR GIRLS.

Appropriation	$21,000 00	
Expenditures		$442 75

REPORT OF SUPERINTENDENT.

To Board of Trustees:

I have the honor to submit herewith the twenty-ninth annual report of the Indiana School for Feeble-Minded Youth for the period ending September 30, 1907:

MOVEMENT OF POPULATION.

	Boys.	Girls.	Adult Females.	Total.
Enrolled October 31, 1906	465	437	133	1,035
Admitted during the fiscal year	37	21	9	67
Total enrollment	502	458	142	1,102
Died during the fiscal year	16	9	2	27
Discharged during the fiscal year	4	4	1	9
Withdrawn during the fiscal year	23	10	..	33
Total died, discharged and withdrawn	43	23	3	69
Enrollment September 30, 1907	459	435	139	1,033
Actual number present September 30, 1907	458	435	139	1,032

	Males.	Females.	Total.
Daily average actually present	453.240	566.035	1,019.276

	Boys.	Girls.	Adult Females.	Total.
Applications presented	45	39	23	107
Applications accepted pending room	35	33	22	90
Applications deferred	2	4	..	6
Applications rejected	8	2	1	11
Applications completed not acted upon	1	4	..	5
Total applications accepted on file pending room	9	33	21	63

Of 107 applications presented for consideration, 90 were accepted pending room, action was deferred on 6, and 11 were rejected. Completed applications on file to be presented at the next regular meeting of the Board are boys, 1; girls, 4; adult females, 5; total, 10. Total applications on file, accepted pending room, are: boys, 9; girls, 33; adult females, 21; total, 63. Four boys were discharged; one as insane and 3 to the care of parents or relatives. Four girls

were discharged, 3 as insane and one to the care of parents. One adult female was discharged to the care of parents, the petition for withdrawal being signed and approved by the judge of the circuit court of the county from whence she came. Of the 33 children withdrawn by the parent or legal guardian, 22 were undoubtedly proper subjects for the institution and should have had the care and protection of the State for the remainder of their lives. I would suggest the establishment of rules or a change in the statutes that would give the Board authority to use their discretion in granting requests for the withdrawal of inmates. A large proportion of the children withdrawn each year belong to a class that will never be self-supporting, even under close supervision, and their return to society is sure to result in acts of violence or indiscretion that will only add an additional burden upon the State. This is especially true as regards the female sex of child-bearing age. If every feeble-minded child was rendered sterile, if the power of reproduction was taken from them, then it would be of little moment to the State whether the individual remained a member of our institutional community or returned to the care of parents or relatives.

Since my last report the Cottage for Custodial Grade Boys has been completed and is now occupied temporarily by 156 girls from "Sunset" Cottage, it being necessary to vacate this building until the additions and changes in the interior are completed. I hope to be able to reoccupy this building by the first of the coming year, at which time the male inmates of the institution will be reclassified, and those belonging to the lower and helpless grades will be transferred to the cottage that has been prepared for them on the east side of the main institution grounds. The removal of these boys from the main building and Colony Farm will give us additional room for from 100 to 125 middle and high-grade boys. The present accommodations for the male sex will be ample to meet all demands made upon the institution within the next ten years, and unless the institution grounds are enlarged we can not attempt to care for a larger number of males than the present buildings will ac-

commodate. There is urgent need for additional accommodations for girls. The female wards in every department are crowded to their utmost capacity and for more than a year we have been compelled to accept all applications for this department "pending room." We have on file now applications for 33 girls and 21 adult females that can not be brought to the institution for want of room.

DISTRIBUTION OF POPULATION.

	Enrolled.	Beds.
Main building—Girls	286	287
Main building—Boys	256	262
Custodial Cottage for Girls	149	157
Cottage for Adult Females	139	126
Cottage, Colony Farm Boys	186	185
Nursery Department Hospital—Boys	17	18
Total	1,033	1,035

OUR SCHOOL DEPARTMENT.

There have been few changes in our school department the past year. Our corps of teachers, with two exceptions, remains the same as recorded in my last report. Prof. Cyrus D. Mead has been reappointed as principal. There has been no increase in the enrollment of this department. We began the year with 400 children attending school. A very complete and interesting report of the work being accomplished by our schools will be found in the principal's report, to which your attention is respectfully directed.

OUR MEDICAL DEPARTMENT.

We are again permitted to report the absence of epidemics, and while our mortality is slightly in excess of that reported last year, the death rate is exceedingly low. The number of deaths for the year was: boys, 16; girls, 9; adult females, 2; total, 27, or 2.65 per cent. Our medical department is seriously hampered in its work for lack of room to properly care for certain classes of hospital cases. The removal of the nursery children from the hospital department to the new building for boys will furnish temporary relief. The management of this department is in charge of

Dr. Chas. G. Beall, our resident physician, whose service has been satisfactory in every particular. Dr. Harold K. Mouser of the class of 1907, Indiana Medical College, was appointed as interne to serve one year. Dr. C. C. Wright of the class of 1907, Indiana Dental College, was appointed as dental interne.

For a complete report of the work in this department, your attention is respectfully directed to the resident physician's report appended hereto.

INDUSTRIES.

Our industries remain the same as reported last year, namely: shoemaking, tailoring, mattressmaking, broommaking, woodworking, carpentering, painting, brickmaking, sewing, mending and comfortmaking, bakery, laundry, gardening, farming and dairy. In addition to these, a large number of children are employed in the various kitchens and dining rooms and in performing domestic duties throughout the institution generally. A detailed report of the work done by the different departments will be found elsewhere.

COLONY FARM.

Our farming operations have averaged with other years. Hay and grass crops were exceedingly good, while oats and corn were injured by the extremely cold weather during the growing season.

An appropriation by our last Legislature has enabled us to add 160 acres of good farm land to our present holdings. This will permit us to place at the colony a larger number of our able-bodied boys, and will enable us to raise a large part of the provender that it has been necessary to purchase from our neighbors in the past years.

STOCK INVENTORY, COLONY FARM.

Milk cows	52
Heifers	13
Heifer calves	11
Calves for veal	4
Bulls	2

Fat hogs and shoats	133
Weaned pigs	45
Brood sows	27
Suckling pigs	83
Boars	3
Sheep	2
Work horses	17
Colts, three-year-old	3
Colts, two-year-old	1
Colts, one-year-old	2
Colts, weanlings	2

RELIGIOUS EXERCISES.

Chapel services are held each Sabbath in the main auditorium, as well as in the different detached cottages. All special days are observed with appropriate services.

RECREATION AND AMUSEMENTS.

The playgrounds should be an important feature of every institution. We are ever on the lookout for something new to keep the child actively engaged while on the playgrounds.

Our camp at colony was opened as usual this year and most of our children were given a vacation of a few days in the woods.

MAINTENANCE.

I am glad to report that it has been possible to close the fiscal year without a deficit. Our maintenance appropriation for the past year was $122,000.00, based upon an actual attendance of 1,000 inmates, with an excess allowance of $116.00 per capita per annum for each inmate over that number. The excess maintenance for the year amounted to $2,450.08, making our total maintenance for the year, $124,450.08, less $10,166.67 deducted from our appropriation on account of the change in the fiscal year. The expenditures for all purposes except repairs and improvements was $114,283.41.

REPAIRS.

The buildings and all permanent fixtures have been kept in good repair.

SPECIFIC APPROPRIATIONS.

The Custodial Cottage for Boys has been completed and occupied since July of the present year. This building is being used temporarily by girls from the Girls' Custodial Cottage while their building is undergoing repairs. They will be removed, however, within a few weeks and the building occupied by boys as was originally contemplated.

CHANGES IN ADMINISTRATION.

Miss Nora Griffin, who was appointed Acting Matron on September 15, 1906, was appointed Matron January 1, 1907.

Mr. Melvin Druckemiller, who had charge of our storehouse for several years, was made Chief Clerk, January 1, 1907.

IN CONCLUSION.

It is a pleasure to again record my appreciation for the valuable assistance rendered by the officers and employes of every grade. If success has attended our efforts in any degree, it has been achieved through the hearty co-operation of a faithful and loyal corps of able assistants.

And to you as a Board I tender sincere thanks for the support you have so generously given me in the performance of my many duties.

Respectfully submitted,

ALBERT E. CARROLL,
Superintendent.

REPORT OF SCHOOL PRINCIPAL.

To the Superintendent:

The School Department respectfully submits its annual report for the period ending September 30, 1907. More pupils have had instruction in manual occupation, in addition to their regular school studies, than at any time in the past. This is true of about two-thirds of the entire number, the other third being children too small or those who have attempted and failed. The different kinds of industrial work in the shops and departments of the institution at large employ many more. Our school term consisted of nine months without the loss of a single day. The attendance was regular and ample material was provided. Our enrollment again averages 400.

GENERAL SCHOOL WORK.

Each child comes to school one-half day, working the other half. "The greatest good to the greatest number" is our effort; the weaker ones not unduly pushed aside by the stronger. The harmonious training of the complete self is not only a possibility with us, but an accomplished fact. The education of today develops uniformly the intellectual, the physical and the emotional; simply stated, the head, the hand, and the heart. The three Rs have not been supplanted by the three Hs; they have been vitalized. Facts have not given way to sentiment, "seeing" and "feeling" have breathed the breath of life into the school room. The eye may place the picture, the ear may be directed toward the harmony, the sense organ of the brain may locate and may know, but the heart "sees," and the heart "feels," and a heart can not be feeble-minded. For this reason our instruction is not wholly didactic. If we have a weak will to appeal to, it does not follow that the emotions are equally as infirm.

The observation of and mingling with nature, so successful the past two years, the teaching of the school room, the influence of the chapel service, the harmony and melody of the various kinds of music pervading the furthest corners of the institution life, have combated the spirit of cruelty and selfishness until a love for the natural has shown that other things live, that other beings have rights, that other people have sorrows and trials. The pennies so freely given by the children to the San Francisco sufferers and the Salvation Army Christmas charities will come back to us as gold. The lesson of each child making a present at Christmas time with his own hands, and personally giving it to the one he wished, can not be reckoned in the material.

Aside from the mechanical phase of the manual in general, and the physical work is in close relation, concentration and will are ever aimed at by the instructors. Weakness in this respect is a characteristic of the feeble-minded. But a movement of the hand presupposes some co-ordination, but in varied degrees. The mind in a way is driving and directing its tool. The better it directs, the more definite the act, and vice versa, the repetition of a rational move by the hand strengthens the will. It is complementary, retroactive. Two units are placed together. The result is seen and felt. The very power acquired by this tangible effort, the very interest aroused, help him place two intangible units, in his mind, with two others and comprehend his four. The value of manual work, then, is felt in every class room and in every study. From the more theoretical above, let us consider the more practical side of our daily instruction and see in what manner the "head and hand and heart" are touched.

SCHOOL DEPARTMENTS.

THE HEAD.

Under the "head training" would fall the kindergarten, kindergarten primary, primary, and grade. This classification most strictly can not be arbitrary, but for convenience we arrange it so, for woven in with the above will be a hand and heart training also.

The two kindergartens follow the Froebellian method with its gifts, occupations, stories, songs, games, and marches. There is the sense training through action, creation, and imitation which brings the child into contact with life, allowing him to interpret it in imagination and action, and to enter his world more conscious of himself and his powers. He can play himself tired with work and work himself tired with play. The atmosphere of the home pervades. He looks after his own bower or plants his own vegetable. Lunches are served over his own linen and china, his own table provided with products of his own window garden.

The two kindergarten primary rooms mark the transition into the primer. The pupil forms his letters with the free arm movement at the blackboard, sounds them phonetically, and combines them into his word. By the phonic, word, or sentence method he is induced to read. An action primer augments the regular one. Simple combinations in numbers are practiced. Action is utilized to the fullest and the environment of the immediate grounds drawn upon.

The boys and girls are divided upon entering the different primary rooms. From the first to the third inclusive, we have nine schools. Following these come an advanced boys' grade to the seventh and a girls' to the eighth. Reading, writing, arithmetic, nature, grammar, physiology, geography, and history are offered according to a daily program. Nature work is dominant. In all texts the regular Indiana series is supplemented by others.

THE HAND.

The "hand" is seen in mechanical drawing, sloyd, bench, clay modeling, fancy needlework, drawing and art, and physical training. Of course the head and heart are also manifest.

The first lessons in sloyd are preceded by simple drawings, with pencil and try square, which the boy follows from the teacher's drawing on the board. She proceeds from the simple to the complex, from the modeling stick or plain cross to the jewel box or taboret. If the pupil is apt, pro-

motion to the bench follows, where the use of the tools is taught. From the halved or miter joint, his muscular activity, through concentration, finally expresses itself in a picture frame, bird box, or book stand. "Truth and growth" are underlying in sloyd work. We try to remove a bad habit by implanting a good one.

The girl enters the modeling room and works in clay from the natural flower, fruit, and animal form, to casts of heads and busts. The pottery work has had a very successful beginning. Fancy needlework alone enrolls over eighty girls in drawn, eyelet, lace, and Hardanger work, hemstitched and monogrammed linen, cut work, Hedebo, Montmellick, cross-stitch, and shadow embroidery. Flower pot covers and hanging baskets are made from reed and raffia. Natural sedges, rushes, and willow withes will also be gathered by the classes and woven into rustic baskets, the frames being put together by the bench boys.

Drawing and art reaches the emotional through the hand. New beauty is seen in the common objects. From the blossom to the seed pod, color is washed or penciled. Trees in their seasons are studied, buildings are placed in perspective, the bird and her nest are outlined and colored. Life and action are sketched, the antique and still life drawn upon, motives, based on nature forms are designed into booklet covers. Oil as a medium has been used. Models in costume pose for the interpretation of character in literature and history.

Regular physical and gymnastic work, in a well equipped gymnasium, reaches every child in school and closes our chapter on "hand" or muscular training. Special endeavor is toward the hands, feet, facial and neck muscles: the hand, for prehensile power, that better writing may result; the foot, for combating the shuffling gait; the facial muscle, for better articuation and speech. We have added several new pieces of apparatus, such as mats, basket balls, flying rings, climbing ropes and poles, an adjustable ladder, balancing beams, a vaulting buck, and vaulting horse. New interest is infused by the introduction of gymnastic dances and games. Hygienic instruction, with a care to dieting in the

dining rooms, and careful medical supervision as to general health allow us to utilize every avenue through which a deficient child may be reached.

THE HEART.

In all the above, the "heart" has been nourished. Time and again the life and action in nature work has demonstrated this truth. But we now offer the most potent agency. Music is indispensable and has its power even over the degenerate nature. Secular and sacred music is rendered with precision and expression by band, orchestra, piano, part and chorus singing. Selections from Balje and Flotow, Schlepegrell and Strauss, Bach and Schumann are creditaby executed. Harmony is contagious and the vibration of the instrument or voice penetrates every fiber of the heart and every corner of the institution, dissipating, at least for a time, the grosser instincts by imparting the refined. Recitals are given annually also for the pubic.

Regular Sunday chapels are held in the main auditorium and separate cottages. The international Sunday School Lessons are followed. Music is rendered, responses are carried, and the larger part join in general singing.

Relaxation and diversion are furnished. Amusement is provided. The anticipation of the bi-weekly entertainments, in which the children take part, equals the realization. Only the best productions are allowed on the stage and the best books are selected for the children's library. Circuses were attended and camp held. Nutting parties are now being formed. Dances and birthday parties will follow through the winter. Arbor and Bird Day, Flower Day, Harvest Home, Hallowe'en, Christmas, Washington's birthday, and the "Fourth" will be celebrated. Thanksgiving, Easter, and Decoration Day will be appropriately observed. Have we not appealed to the "heart?"

CONCLUSION.

We were gratified in having several special visits the past year from public school teachers and institution officials. Their purpose was to inspect and observe our work. We

were highly complimented by the State Superintendent of Public Instruction accepting several pages of material from the pupils of our school for the 1907-08 "Arbor and Bird Day Annual." We trust it may be a means of arousing more interest in similar work in the public schools.

The children's library has been thoroughly overhauled and reading rooms in the various departments will help us hold what is once accomplished with the child. A museum case for our natural history objects would prove of immense value in our work. Our most urgent need is a new school building. The present one lacks not only modern conveniences but we are compelled, for want of room, to utilize the basement, and rooms separate from the building.

The coming winter will see no especial change in the general policy and course so successfully pursued the past two years. A foundation has been laid by definite accomplishment that insures a splendid winter's work. We strive to make the environment of the school room so attractive that the child feels a privilege and a joy in attending. At all times example and deportment are guarded that the silent influence of association and character may be felt by an imitative child.

I wish to express to you my appreciation and acknowledgment of the work of the teachers and to commend them to you. You can place your confidence in them. The close sympathy in which you stand to their work offers an incentive which makes it impossible for them to fail. They are grateful to you for it.

Respectfully submitted,

CYRUS D. MEAD,
Principal.

REPORT OF RESIDENT PHYSICIAN.

Mr. A. E. Carroll, Superintendent:

The following is the report of the Medical Department for the period of eleven months ending September 30, 1907:

The general health has been fair. We have had a small epidemic of mumps. Late last fall we had a number of cases of typhoid fever, the source of which, after a careful investigation, we were unable to discover. The results of the experimental work done in the laboratory during the year will be published later. Our medical library has been increased materially and now consists of 150 volumes. The hospital building has been kept in good repair. We have added a sterilizing apparatus to our operating room equipment.

The removal of the division of young custodial children into the new Custodial Cottage for Boys will give us some of the much-needed room which we asked for in our last report. This addition of room will enable us to take care of our tuberculous and infectious cases in a much more satisfactory manner.

Sixteen autopsies have been held during the period. The dispensary cases have numbered 4,362. The admittances to the hospital have been 667 boys and 607 girls. The death rate for the period of eleven months has been 2.65 per cent.

The members of our consulting staff have been of much service during the year and we are under many obligations to them for their advice and assistance.

Dr. Harold K. Mouser, class of 1907, Indiana Medical College, was appointed interne to serve one year. His work has been conscientious and highly satisfactory in every respect.

Dr. C. C. Wright, class of 1907, Indiana Dental College, was appointed dental surgeon. His duties were performed in a thorough and careful manner.

Below is appended a list of the more important medical and surgical cases, the dentist's statistical report, and the mortality record.

In conclusion, I wish to again express my appreciation and thanks for the support and co-operation which has been accorded me by both the management and hospital corps. This has made our work not only pleasant but efficient.

Respectfully submitted,

CHAS. G. BEALL,
Resident Physician.

Mabel Harvey, Mending and Comfort.
Augusta Hopkins, Sewing Room, Cottage for Adult Females.
Mrs. M. McLaughlin, Sewing Room, Colony Farm.

REPORT OF BOARD OF TRUSTEES.

To the Honorable J. Frank Hanly, *Governor of Indiana:*

Sir—In compliance with the law, the Board of Trustees for the Indiana School for Feeble-Minded Youth respectfully submits for your consideration its thirtieth annual report for the fiscal year ending September 30, 1908. Included in this is the report in detail of the Superintendent, School Principal, Resident Physician and the several statistical exhibits covering the various operations of the institution for the year.

There has been no change in the personnel or the organization of the board since our last report, nor has there been any noteworthy changes in the executive management of the institution. Normal conditions have obtained in all the several departments, and while the growth of the institution has been exceptional and has placed increased burdens upon those in charge, the general efficiency and high standard of the institution have been maintained.

The enrollment on the 30th day of September, 1907, at the time of our last report, was 1,033. During the year we have received 123 inmates and have lost by death 22, by discharge or withdrawal 28, leaving the total enrollment on September 30, 1908, 1,106, making an increase in the population of 73 for the year.

The completion of the new Custodial Cottage for Boys and the addition to the Custodial Cottage for Girls have made this large increase possible. The relief afforded the institution through the completion of the Custodial Building for Boys gives us room for about 65 male inmates of the brighter grade. With our present accommodations and in the event of our being relieved of the necessity of receiving epileptics, we believe further extensions in the way of additional building for boys will be unnecessary. However, our accommodations for both girls and adult females have been crowded to the limit for the past three years. Some relief was afforded during the year by the completion of the addition to the Custodial Cottage for Girls, but this was only temporary. We have on our waiting list at this time, completed papers for the admission of 14 girls under 16 years of age and commitments for 28 adult females, none of which can be received or cared for except as vacancies occur

through death or withdrawals. Many of these cases are extremely urgent and some provision should be made for their care and protection in this institution. This is especially true in the case of the adult female department, where we now have such a large waiting list.

The steady increase in our enrollment the past ten years makes it imperative that we enlarge our hospital facilities. The present hospital building was originally constructed to take care of the requirements of an institution of 500 inmates. With the present enrollment of over 1,100 and the contemplated additions that will place in our care 1,300 to 1,350 inmates, our present hospital facilities are entirely inadequate.

All permanent improvements for which the last General Assembly granted specific appropriations have been completed. These include: Addition and alterations to the Custodial Cottage for Girls; plastering the walls in the Custodial Cottage for Boys; new equipment for the electric lighting and power department; a high pressure pump for the general distribution of water; the extension of water mains for fire protection on the institution grounds; the laying of cement walks and floors, and the purchase of additional farm land. All of these improvements were completed and farm land purchased within the amounts appropriated by the legislature.

Following are the expenditures from the various funds, both regular and specific, for the fiscal year ending September 30, 1908:

Maintenance.

Regular appropriation	$122,000 00	
Excess on 54.032 inmates over 1,000	6,591 53	
Expenditures		$128,587 86
Amount unexpended		3 67

Repairs and Painting.

Regular appropriation	$7,500 00	
Expenditures		$7,499 96
Amount unexpended		04

Farm Land.

Appropriation (unexpended, 1907)	$13,325 00	
Expenditures		$13,325 00

Farm Drainage.

Appropriation	$1,000 00	
Expenditures		$999 33
Amount unexpended		67

Addition to Custodial Cottage for Girls.

Appropriation (unexpended, 1907)	$20,557 25	
Expenditures		$20,557 17
Amount unexpended		08

Electrical Equipment.

Appropriation	$6,000 00	
Expenditures		$5,986 40
Amount unexpended		13 60

High Pressure Pump.

Appropriation	$1,200 00	
Expenditures		$1,200 00

Extension of Water Mains on Institution Grounds.

Appropriation	$4,000 00	
Expenditures		$4,000 00

Cement Walks and Floors.

Appropriation	$3,000 00	
Expenditures		$2,999 97
Amount unexpended		03

Plastering Custodial Cottage for Boys.

Appropriation	$4,300 00	
Expenditures	4,296 22	
Amount unexpended		3 78

Tuition Receipts and Industrial Proceeds and Earnings.

NEEDS OF THE INSTITUTION.

We present herewith the following needs of the Institution for the coming biennial period:

REGULAR APPROPRIATIONS.

Maintenance.

We believe the annual maintenance appropriation for the next biennial period should be $130,000.00 based on 1,000 inmates actually present with an excess allowance of $130.00 per capita per annum for each inmate actually present over that number.

Repairs and Painting.

On account of the age and number of our buildings, constant repairs are needed. For this purpose there should be appropriated $8,500.00 per annum.

SPECIFIC APPROPRIATIONS.

For the past three years we have found the regular maintenance appropriation insufficient. Supplies of all kinds and wages of help have increased greatly, while our maintenance fund has remained stationary. Although we have closed each year without a deficit, it has been at the expense of our equipment and regular maintenance supplies. In order to avoid a deficit during the present year, we would recommend an additional appropriation of $10,000.00 to supplement our regular maintenance fund.

For a general hospital building and equipment to meet the requirements of the present population, we would recommend an appropriation of $100,000.00.

For a cottage for adult females to accommodate 120 beds, we would recommend an appropriation of $60,000.00.

For a cold storage and ice plant, including building for same, we would recommend an appropriation of $7,500.00.

For additional equipment in the engineer's department, including one oil separator, a duplex steam trap system for boiler plant, an electric motor and equipment for brick yard, we would recommend an appropriation of $1,925.00.

For additional equipment in the bakery, including one dough mixer, one moulding machine, a metal proof room and steel dough troughs, we would recommend an appropriation of $2,500.00.

For two thousand eight hundred twenty (2,820) feet iron fence to protect the main institution grounds, we would recommend an appropriation of $3,200.00.

For 12 fire escapes and ladders as recommended by the state factory inspector, we would recommend an appropriation of $2,500.00.

For cement walks and grading roadways and grounds, we would recommend an appropriation of $2,500.00.

For a root cellar at Colony farm, we would recommend an appropriation of $1,500.00.

For a frame stock barn at the north farm, we would recommend an appropriation of $1,500.00.

For farm drainage and fencing, we would recommend an appropriation of $1,500.00.

In closing our report we wish to take this opportunity to express our grateful appreciation of the interest you have always shown in the welfare of this institution and for your encouragement and counsel.

Respectfully submitted,

James W. Sale,
Mary R. Harper,
Edward M. Wilson,
Trustees.

Fort Wayne, Indiana, September 30, 1908.

REPORT OF SUPERINTENDENT.

To the Board of Trustees:

I have the honor to submit herewith the thirtieth annual report of the Indiana School for Feeble-Minded Youth for the fiscal year ending September 30, 1908:

MOVEMENT OF POPULATION.

	Boys.	Girls.	Adult Females.	Total.
Enrolled September 30, 1907	459	435	139	1,033
Admitted during the fiscal year	69	43	11	123
Total enrollment	528	478	150	1,156
Died during the fiscal year	9	7	6	22
Discharged during the fiscal year	3	..	3	6
Withdrawn during the fiscal year	14	8	..	22
Total died, discharged and withdrawn.	26	15	9	50
Enrollment September 30, 1908	502	463	141	1,106
Actual number present September 30, 1908	494	461	141	1,096

	Males.	Females.	Total.
Daily average actually present	467.532	586.499	1054.032

	Boys.	Girls.	Adult Females.	Total.
Applications presented	72	30	18	120
Applications accepted pending room	68	26	18	112
Applications deferred	..	..	..	...
Applications rejected	4	4	..	8
Applications completed not acted upon	5	5	4	14
Total applications accepted on file pending room	9	14	28	51

Of 120 applications presented for consideration, 112 were accepted pending room and 8 were rejected. Completed applications on file to be presented at the next regular meeting of the Board are: Boys, 5; girls, 5; adult females, 4; total, 14. Applications on file, accepted pending room, are: Boys, 9; girls, 14; adult females, 28; total, 51. Seventeen boys, seven girls and two adult females were withdrawn by parents or relatives. One girl and one adult female were discharged, both being placed in good homes.

The addition and alterations to the Custodial Cottage for Girls were completed early in February of the present year and the building was immediately reoccupied by the girls who had been housed temporarily in the Custodial Cottage for Boys, which building had been completed some seven months previous. The addition and alterations in the Girls' Cottage give us an increased capacity of about 28 beds. By using the second floor hall as a sitting room, we were able to establish a new division, accommodating 40 middle grade girls. The Custodial Cottage for Boys, which was completed in June, 1907, was used for about seven months, as stated above, for housing the custodial grade girls while their building was being remodeled. On February 15, 1908, the building was occupied by 148 low grade boys, forming five complete divisions. These boys were selected from the various departments in the Institution but principally from Divisions Six and Eight of the main building, Division Fifteen at Colony Farm and the nursery department at the hospital. This building has a capacity of 161 beds, which is 11 more than it was designed to accommodate.

Rooms in the East Wing, first floor, formerly occupied by No. Six Division as day room and dormitory, have been given to Division No. Five as a day room and clothing room. The other rooms vacated by the low grade boys will be used as a sitting room for employes, Supervisor's office, children's library, recreation and reading room.

All applications for middle and high grade boys have been accepted promptly during the present year and a large proportion of the applications presented for lower grade boys have been taken care of. However, it has been necessary to place on the waiting list, those of the helpless or nursery class for want of room in the department to which they would belong. We have accommodations for about 65 boys of the better class or those who would benefit by school or industrial training. The need of additional room for adult females is very urgent. The present cottage used for committed cases has been crowded for the past two years, necessitating the carrying of a large number of commitments on the waiting list. These can only be accepted as vacancies occur, and as all cases received into this department become permanent wards of the state, there is little hope for relief except in the erection of another building. I would recommend an additional cottage for 120 women to be placed directly east of the present building, arranging culinary department so that the cooking for both buildings could be done in one kitchen.

DISTRIBUTION OF POPULATION.

	Enrolled.	Beds.
Main building—Girls	287	285
Main buliding—Boys	209	224
Custodial Cottage for Boys	161	161
Cottage Colony Farm Boys	132	182
Cottage for Adult Females	*142	128
Custodial Cottage for Girls	175	192
	1,106	1,172

SCHOOL DEPARTMENT.

We have reason to be proud of the progress made in our schools. Under the able direction of Prof. Cyrus D. Mead, we have attained a standard that compares favorably with any school of like character in the country. Our motto, "the greatest good to the greatest number," is faithfully lived up to. The precocious child is always encouraged, but not to the extent that the duller, slower child is neglected. Our school house should be enlarged. We have three classes that are compelled to occupy basement rooms that are poorly lighted and ventilated and were it not for our crowded condition, would not be considered for class room work. The present building was erected at a time when the Institution population was less than 500 inmates. Our daily average population has more than doubled and each biannual period we build to care for a greater number of children, and this requires that the educational and other departments be enlarged accordingly.

MEDICAL DEPARTMENT.

Our hospital department has cared for the usual number of sick and dispensary cases. The mortality table shows 22 deaths for the year, or 2 per cent. of the population. The death rate is not large when you consider that more than two-fifths of our population belong to the low grade imbecile or idiotic type. Only two deaths occurred among the high grade inmates during the year. We have been free from epidemics of a serious nature. The removal of the nursery ward from the hospital building has enabled a more complete isolation of tubercular cases which relieved the crowded condition in the hospital wards to some extent. However, the work is still hampered for want of necessary room and adequate facilities in caring for all cases. A new hospital is one of our urgent needs.

* Eight adult females are housed at the Custodial Cottage for Girls.

Dr. Chas. G. Beall, Resident Physician, resigned May 31, 1908, to enter private practice. His successor, Dr. Harold K. Mouser, former medical interne, took charge of the hospital at once. He came to us well equipped for the work and has shown his fitness for the position.

Dr. Douglas Hunter was appointed dental surgeon for the year 1908.

A complete report of the surgical and medical cases, together with the Dental Surgeon's report, is appended hereto.

INDUSTRIES.

About 250 children are profitably employed in the industrial shops and the various domestic departments. Many have become exceedingly proficient in the work of their department and under supervision are able to accomplish sufficient work of a character that entitles them to be classed as institutionally self supporting. Our industries include shoemaking, tailoring, mattressmaking, broom-making, woodworking, carpentry, painting, brickmaking, sewing, mending and comfortmaking, bakery, laundry, gardening, farming and dairy. A detailed report of the work of these departments is appended hereto.

COLONY FARM.

The purchase of additional farm land made possible by an appropriation from the last legislature will add greatly to our farm operations. An epidemic among our swine last winter carried of 125 head, or nearly one-half of our herd. The disease which was supposed to be cholera, was finally controlled and I do not anticipate a recurrence. Our crops for the year and increase in the live stock have been fairly profitable and should reduce the farm expense considerably the coming year.

RELIGIOUS SERVICES.

Chapel services are held each Sabbath in the main auditorium and at all of the detached cottages. All special holidays are observed with appropriate serevices.

RECREATION AND AMUSEMENT.

The play grounds and woods, dances, birthday parties, biweekly entertainments and various forms of healthful and harmless amusements are a part of the daily life of our children.

MAINTENANCE.

The maintenance appropriation for the past year was $122,000.00, based upon an actual attendance of 1,000 inmates, with an excess allowance of $122 per annum per capita for each inmate over that number. The excess allowance amounted to $6,591.53, making our total maintenance for the year $128,591.53. The expenditures for all purposes except repairs and improvements was $128,587.86. The maintenance allowance for the past three years has not been sufficient to care for our needs. Maintenance supplies of every kind have been gradually increasing in value for several years, while our maintenance appropriation has remained stationary or suffered a slight reduction. It is true we have closed each year without a deficit, but this has been accomplished at the expense of our equipment. The next legislature should be asked to appropriate $10,000 to supplement the maintenance appropriation for 1908-09. For the years 1909-10 and 1910-11 the maintenance fund should be increased to $130,000 for 1,000 inmates actually present, with an excess allowance of $130 per annum per capita for each inmate over that number.

GENERAL REPAIRS.

The appropriation for repairs and painting should be increased to $8,500 per annum. The Institution property has been kept in fair condition on the allowance now made, but as our buildings and fixtures are getting old, necessarily the expense in keeping up repairs increases each year and unless these repairs are cared for promptly, great damage to property is likely to result.

SPECIFIC APPROPRIATIONS.

All improvements for which the legislature of 1907 granted appropriations, have been completed and include the following: Addition and alterations to the Custodial Cottage for Girls, adding a kitchen, dining room and dormitory, and remodeling the old structure by putting in iron and slate stairways, tile floors on the first floor hall, rewiring the entire building and placing large, roomy porches at the south and west entrances.

An appropriation for plastering the walls in the Custodial Cottage for Boys was made necessary because of the roughness of the brick used in the construction of the walls. The work was completed and the building occupied in July, 1907.

Two hundred fifty-four and one-quarter (254¼) acres farm

land was added to our holdings, giving us now a total of 510 acres, which is sufficient for our present needs.

Much of the farm land was ditched and tiled the past year, but there remains several fields that are badly in need of under drainage.

A complete new equipment of electrical machinery, switch boards, etc., has been installed, the plant is now modern in every particular and of sufficient capacity to furnish all current required without overloading.

The new high pressure compound pump, 10x12x8½x12 inches was installed. This replaced a pump that formerly furnished our main water supply but which had become so old and worn that it could not be depended upon for regular service.

The water main connecting with the city fire line, has been extended throughout the grounds with standard fire hydrants placed at convenient points. Stand pipes and hose racks have also been placed in the three detached cottages, thus giving ample fire protection to all buildings on the main Institution grounds.

More than 20,000 feet of cement walk and floors have been put down. A small appropriation will enable us to extend walks to all of the detached buildings.

NEEDS OF THE INSTITUTION.

The following improvements are recommended for the ensuing biennial period:

A general hospital building, to accommodate both sexes, with ward capacity for 100 patients.

One cottage accommodating 120 beds, to be used for cases committed to the department for adult females.

An addition to the school building, to consist of five class rooms, two rooms for special classes and a library department.

A cold storage and ice making equipment. This will require a new building, as the old cold storage rooms are not properly located nor are they large enough for our needs.

The bakery should have the following machinery and equipment: Dough mixer, moulding machine, metal proof room and dough trough.

The following equipment is required for the Engineer's and Industrial departments: One machinist's lathe, one large pipe machine, one oil separator for steam line, duplex trap system for receiving condensation from low pressure steam lines and return same

to boilers, electrical irons for laundry and sewing departments, one 30 horse-power motor for operating brick-making machinery, including construction of pole line, wire, etc.

A small appropriation is required to build cement walks and improve roadways and finish grading around Cottage for Boys.

Fire escapes should be placed on all buildings that have sleeping rooms on the second floor. This is recommended by the State Bureau of Inspection, and should be done at once.

The iron fence which protects about two-thirds of the front property line should be extended along the entire front of the grounds and to a point about 100 feet north of the Boys' Cottage. Also along the west side of the property to a point north of the girls' play grounds.

An appropriation for the following improvements at Colony Farm is much needed: A brick, slate roof horse barn with twenty stalls and necessary room for feed, harness, etc. The barn now in use is poorly constructed, unsanitary and unfit for the purpose for which it is used.

A concrete root cellar for beets and other roots used for stock feeding and such vegetables and fruits as are stored for winter use.

A frame barn at North Farm to care for about forty head of young stock. There are two sheds on this farm now in use, but they are old, dilapidated affairs, unfit for use and should be torn down.

The fencing and tile drainage that will be required the coming year can not be done from our regular maintenance appropriation. A small specific fund for this purpose is needed.

SPECIAL MENTION.

A small fire occurred in our industrial building on October 24, 1907. It originated in the painting department, the cause of the fire being attributed to spontaneous combustion. The total loss to building and contents amounted to $527.80, which amount was recovered from the insurance companies and covered into the state treasury as required by law.

IN CONCLUSION.

I desire to recommend for your consideration and commendation my officers and co-workers in every department. Their loyal support and the faithful and conscientious discharge of the many arduous duties devolving upon them have made possible the success which has been ours in the work of the past year.

I also desire to record a grateful acknowledgment to each member of the Board for their helpful co-operation and encouragement which has been given me at all times in the discharge of my many duties.

Respectfully submitted,

ALBERT E. CARROLL,
Superintendent.

REPORT OF SCHOOL PRINCIPAL.

To the Superintendent:

Two phases of work present themselves when submitting to you the regular annual report of the school department. Are we equipped, and do we follow in our school instruction the pedagogical truths that have been accepted as fundamental in the curriculums and teachings of our public schools? It may be said that the theories which have been evolved in the fertile minds of men who have lived for what they could give to the world, make sounder pedagogy when applied to the deficient child than when followed in the courses of study in the better known public school. It does not follow, however, that the science of the mind when applied by man, or the skill of the teacher can create or implant what nature in its mystery has withheld. It does not follow that malformation can ever become formation or that existing brain cells may assume the burden through life of those lacking, the possession of which, should cause every thoughtful being to render praise without end to the One Allwise. Why do we educate them? There is abundant material in this question for a report separate in itself.

Are we equipped? The State of Indiana provides each year for the maintenance of over eleven hundred deficient children. Many of them, although there are exceptions, come from the byways of society and have known few of the comforts and none of the luxuries of life. The time was when he was left on the mountain side to perish. He would slowly but positively meet a figurative death were he thrust, in the conflict for subsistance, in competition with his more favored brother. He is admitted to our institution. A physical, mental, and clinical test is held and about fifty per cent. is passed as "schoolable," or possibly schoolable. He is assigned to his division or group, and so the other half. Carefully chosen and prepared food is given him; well lighted and evenly warmed and ventilated day and sleeping rooms are at his disposal; regular habits are formed; hot and cold water is prepared for his bath, which he must take; clean and comfortable beds are provided for him; and he is neatly and warmly clothed.

As a rule, and in particular with the improvable half which has entered, four hours of work, four hours of school, six hours of

recreation and amusement, and nine or ten hours of sleep constitute his daily life. From the standpoint of training, his work hours are as necessary as his school. After he has reached his limit in the schools his work day will be lengthened. The different industrial departments now employ about two hundred boys and girls. As a beginner, however, after he has passed the hospital, a special school awaits him. Simple sensory tests are tried and his mentality is determined. If his speech can be bettered, he returns to the special school at stated periods. If he passes this school he is given his definite room assignment and the daily school routine awaits him. A pleasing environment is of no little value. He enters a room, the first appearance of which is his pride, for his teacher has converted it into a place rarely equalled in the public school. No piece of apparatus is lacking and no material that could possibly be of advantage has ever been denied.

If the child is a kindergartener, the kindergarten opens for him. We have two separate schools. If he is advanced above this, but is not yet ready for the reader, a kindergarten—primary room receives him. In this there are two distinct schools. From the first to the third grade we have eight schools, from the fourth to the seventh we have three. Pupils falling behind in their classifications may be sent to special school and there receive individual help, to be returned to their room when they have made sufficient advancement. This special school aids in a more distinct classification and allows us to follow in the main a course of study suitable to our school.

In the distinctive manual lines, two classes model in clay, four take mechanical drawing and sloyd, and one works at the bench in carpentry. Four classes receive instruction in fancy needlework, lace, and basketry, and four in drawing and art. Girls are offered piano, and instruments for orchestra, and boys are chosen for band. The larger part of five hundred children commit chapel songs and receive voice instruction. All of these special and distinct lines of work have their separate and special teachers. The greater part of the pupils above kindergarten meet a teacher in some manual or special line. Room hand work also supplements daily school work. In addition to the regular kindergarten occupations and special manual lines, ten kinds of hand work formed a part of our last day exhibit in June.

Besides the playgrounds, entertainment is provided throughout the winter, and five chapels each Sunday are conducted in various buildings. A children's library offers the most carefully chosen

books and magazines to the boys and girls and the former are permitted access to an evening reading room under the supervision of a librarian. Every good thought planted takes that much nourishment from the soil of an evil one. Much supplementary reading matter is being added to various separate school room libraries, for reading leads. Texts other than readers are used primarily as readers. Nature work is constantly before the child for his seeing and his feeling. A museum of natural objects collected by the children is drawn upon by any room. Through all work is woven the movements of the hand. A gymnasuim, second only to our city schools, is well equipped with modern apparatus. Almost without exception our teachers have either studied or traveled the past summer, two requisites in the ambitious teacher's life.

We do not lack in equipment, but we do lack in room. For six years schoolable children have been denied access to the school building and basement rooms have been improvised, pre-empting much needed space for living room. Two departments of manual work occupy poorly lighted and ventilated school basement rooms. A double cloak room is at present being occupied by our special school. The boys' schools are overcrowded and we are absolutely unable to care for one school. An addition, if not a new building, is imperative.

Having observed the more practical side of our schools, we ask ourselves sometimes whether or not we are pedagogical. Eight hundred years after the dawn of a new religion, a candle light in education flamed for a moment in the "Dark Ages" of the old world when Charlemagne astonished the "schoolmen" with the announced principle that "every child had a right to an education." Later it became a function of the state to provide for such. This has become a cardinal pedagogical truth that no man now denies. Our Institution is founded and exists on such a truth and seven hundred children receive positive instruction that would be totally denied them in public. As far back as Rome, when she was sowing the seed of moral corruption that was to be her downfall, Cicero held "that the amusements and environments of the child should be such as to elevate and refine, as well as to properly develop his powers." The chapel, the entertainments, the discipline, the books, the daily routine and work, the reading rooms, the music, the schools, all are safeguards thrown about him in greater abundance than would open to him were he not here. In fact, here is the only place they would open to him.

Froebel perfected the kindergarten, and accepted truths today

are, "all instruction must be made pleasant and interesting," "the instinct of play and self activity should be utilized in teaching," and "through the senses comes all knowledge." Our kindergarten schools are replete with object and sense material and the games and songs and occupations happily engage sixty children each day. "Present the object before the symbol;" "offer the concrete before the abstract;" "move from the known to the unknown," are abc's in pedagogy. Our primary instruction is daily based on these as viewed from the objects and devices employed by the teacher, from the action work preceding the action word, from the busy material made, from the environment and daily experience of the child leading to his expression of the same.

Interest is a pin prick into sloth. Attention is the result, the greatest task in a teacher's work and a herculean one with us. An attractive room presents a warmth the instant the child enters. He appreciates a pleasant surrounding as keenly as any child. Various supplementary readers are in the room libraries that flagging interest may be met by the reading of a new story. An institution speller presents to him words of his daily life. An abundance of objects of nature surround him, hand work offers relaxation, and an apt story awakens. I have visited school rooms where the children refused to take their eyes from a teacher while telling an oral story. That teacher is strong who can arouse interest in a story and she should be rich in them. The natural teacher is the one who utilizes the activity of the child and instills interest by her ingenuity. Exercises are devised in gymnastics that appeal keenly to the play instinct but that are related to good circulation, good respiration, and good muscular control. In a figurative way, instead of muscle training and co-ordination by sawing wood, we offer the children a game. Work becomes play when it is interesting.

The teaching of the future will be as much to and through the heart as the intellect. Our prisons have many head educated men but very few heart educated. The Great Teacher taught by example and founded the greatest, yet simplest, pedagogical truth. An effort toward this is at least in every teacher's power. Her work is the most sacred of all works. If she feels it, she can never be remunerated. We wish to express publicly our appreciation for your liberality and the confidence you give us.

Respectfully submitted,

Cyrus D. Mead.

REPORT OF RESIDENT PHYSICIAN.

'o the Superintendent:

The following is the report of the Medical Department of the ndiana School for Feeble-Minded Youth for the fiscal year ending September 30, 1908:

One mild case of typhoid fever made its appearance, the source f which could not be ascertained. We have had one slight epidemic onsisting of forty cases of influenza, giving rise to no deaths or equelæ.

In August the hospital building was painted throughout. The stablishment of a ward for the isolation and treatment of active ases of tuberculosis makes the danger from the spread of this read disease much less.

Admittances to the hospital have numbered 822 girls and 837 oys. Three thousand eight hundred twenty-three were attended n the dispensary. During the year we have had twenty-two deaths, iving a death rate of 2 per cent.

Dr. Douglas Hunter was appointed dental surgeon and he has iven complete satisfaction in every way.

I give below a list of the important medical and surgical cases, he report of the dentist and the mortality record. I want to thank he management, the consulting staff and the hospital corps for the indly assistance they have rendered during the year.

Respectfully submitted,

H. K. Mouser,
Resident Physician.

CASES TREATED.

Medical and Surgical:

Trachoma	1
Simple corneal ulcer	3
Iritis	2
Chronic interstitial keratitis	1
Blepharitis chronic	1
Intra-ocular hemorrhage (traumatic)	1
Acute otitis media	7
Organic heart disease (broken compensation)	3

Mrs. Clara Juergens, mending and comfort.
Augusta Hopkins, sewing room, cottage for adult females.
Mrs. M. McLaughlin, sewing room, colony farm.
Rosalynn George, sewing room, custodial cottage for girls.

REPORT OF BOARD OF TRUSTEES.

To the Honorable Thomas R. Marshall, Governor of Indiana:

Sir—The Board of Trustees of the Indiana School for Feeble-Minded Youth has the honor to present for your consideration its thirty-first annual report for the fiscal year ending September 30, 1909.

Attached will be found a detailed account of the year's work as reported by the superintendent, school principal and resident physician, together with various statistical exhibits.

On May 25, 1909, Mr. Edward M. Wilson of Fort Wayne, after eight years of faithful service to the State as trustee of this institution, retired and was succeeded by Rev. Anthony M. Ellering of Columbia City under your appointment. Mrs. Mary R. Harper of Fort Wayne was reappointed a member of the board by you, having already served for twelve years. At this time the board was reorganized as follows: Anthony M. Ellering, president; Albert P. Sinclair, vice-president; Mary R. Harper, secretary, and James W. Sale, treasurer. Mr. Albert E. Carroll has been continued as superintendent and has given the board faithful and meritorious service throughout the year. He has also retained the executive heads of the various departments without change, and is supported by an excellent corps of loyal officers and employes, with excellent discipline manifest in every part of the institution.

The population of the school has steadily grown and shows a net increase of 43 persons for the year, and is almost at the limit of our present capacity, there being but 28 vacant beds, and these available for boys only. The female departments are overcrowded, with 19 accepted applications for girls of school age and 29 adult females (committed by the courts) on our waiting list. With an appropriation of $60,000 for a new cottage for adult females which will become available on November 1st, we shall be able to care for the adult females before the end of the next fiscal year, but we shall be compelled to reject applications for a large number of girls before additional room can be supplied.

No epidemic of disease has scourged us during the year, and the health of the inmates has been generally good. Our mortality rate is slightly increased over the previous year, but is still remarkably

low considering the character of our inmates, being 2.7 per cent of the population, comparing very favorably with like institutions of other states.

Owing to the marked advance in cost of food supplies since our per capita of maintenance cost was fixed by the General Assembly, we have with difficulty been able to keep within the prescribed limits for maintenance expenditures during the past year without lowering the standard of living for the children. But with the aid of a specific appropriation of $10,000 additional maintenance for the past year and by most rigid economy we have closed the year without a deficit. For the next biennial period we will have available a per capita allowance of $130 per inmate, which approximates very closely the actual cost for the past year.

The regular appropriation of $7,500 for repairs has enabled us to do much needed work, and the physical condition of the State's property has been fairly well maintained.

From the specific appropriations available during the present year a number of excellent improvements have been made. Notable among these is a first-class cold storage and ice plant which is nearing completion and which will be of great benefit and advantage to the institution. The value of our farming lands has been materially improved by much needed draining and fencing. We are pleased with the result of our farm operations during the past year as shown by the statistical tables herewith. The increased produce from our enlarged farm area came at an opportune time, and we commend the wisdom of the Legislature in providing additional farm land for the institution. It has solved the problem of employment for a considerable number of the boys, and we believe it will be of material assistance in holding the maintenance cost of the institution to the remarkably low record that it has held for several years.

Under a specific appropriation made by the last General Assembly fire escapes are now being erected at such places as were ordered by the State Factory Inspector, and by January 1st will be fully completed. With these additional facilities and with our own system of water hydrants supplemented by protection from the city water works, we feel that every precaution has been taken to guard against fatalities from fire, and that the lives of our inmates and the property of the State is well protected.

Under the law the trustees of this institution are required to carry fire insurance on the buildings, and we now have insurance in good substantial companies aggregating $100,000.00, at an average

rate of $.88175 per hundred dollars per annum. A complete statement of the regular and specific appropriations made by the last Legislature and the disbursement of the same for the period ending September 30th, 1909, is as follows:

Maintenance.

Regular appropriation	$122,000 00	
Special appropriation	10,000 00	
Excess on 107,408 inmates over 1,000	13,103 85	
Expenditures		$145,100 10
Amount unexpended		3 75

Repairs and Painting.

Regular appropriation	$7,500 00	
Expenditures		$7,500 00

Cold Storage and Ice Plant.

Appropriation	$7,500 00	
Expenditures		$2,657 72
Amount unexpended		4,842 28

Fire Escapes.

Appropriation	$2,500 00	
Expenditures		$197 25

Applications completed not acted upon	0	0	0	0
Total applications on file pending room	5	19	29	53

The number of applications and commitments presented is slightly in excess of last year. Of 124 applications presented, 62 boys, 33 girls and 22 adult females were accepted. Two boys and 3 girls were rejected, not being proper subjects for this institution. Action was deferred on 2 girls. Admitted during the year: boys,

57; girls, 25; adult females, 20; total, 102. Six boys were discharged, 4 to the care of parent or guardian and 2 to make their own way. One found employment in Canada, while the other joined the regular army. My last report of these boys stated they were getting along all right. Of the 2 girls discharged, one was returned to the Board of Children's Guardians of Marion County, and one to the care of parents. Three adult females were discharged and one withdrawn upon the recommendation of the judge of the Circuit Court of the county from whence they were committed. Eleven boys and 5 girls were withdrawn by parents or relatives. Three boys are absent from the institution without leave. They left during the months of June and July, since which time we have been unable to learn of their whereabouts.

The departments for girls and adult females are crowded to their greatest capacity and we can not hope for betterment of conditions until the new Cottage for Adult Females, for which the last Legislature made appropriation, is erected. The appropriation for the improvement is made available October 1, 1909. Work on excavations will be started at once, but because of the lateness of the season and not having sufficient brick manufactured to complete the building, it was thought advisable to wait until early spring before beginning work on same. We should be able to complete this building within nine months after contractors begin work, and furnish it ready for occupancy not later than November, 1910. When this cottage is completed all adult females now on the waiting list, as well as those that will be committed to us during the present fiscal year, can be accepted and properly cared for. Until then, it will be necessary to continue accepting committed cases pending room, issuing acceptance only as vacancies occur by death or discharge. While the erection of this new cottage will furnish relief as concerns the adult female or women of child-bearing age, it will not enable us to care for the large number of applications that are accumulating for girls under 16 years or those of schoolable age. However, I would not recommend further extensions on these grounds until we know what effect the opening of the Village for Epileptics will have on the demands now made upon this institution. We still have accomodations for about 30 boys of the higher and middle grade class. All applications for males have been accepted promptly excepting those belonging to the nursery department, and we have but three applications for such cases on the waiting list at the present time.

SCHOOL DEPARTMENT.

The number of children attending school remains about the same as in former years. We have 385 children in the school department. Every child upon entering the institution is examined carefully and if the mental or intellectual status is such as to warrant a school test, it is given a trial in our "laboratory." This test continues until the teacher is satisfied that the child can or can not be benefitted by school training. If after such trial the child fails to respond to the methods employed in the school department, it is taken from the schools and assigned to the department offering the greatest possibilities for its advancement. Every child is given a thorough trial before its place in the institution community is finally determined.

By enlarging some rooms that were formerly used as cloak rooms and placing partitions in the basement under the exercise hall, we have been able to add four fairly good rooms to the school building, which has made it possible to have all classes recite in the one building. The report of the principal attached hereto is worthy of your attention.

MEDICAL DEPARTMENT.

The health of our wards has been good. We have been spared from epidemics of every kind. The low mortality as shown by the resident physician's report speaks highly for the care and attention received by our children from the medical department.

(*Sixteen adult females are housed in the Custodial cottage for girls.)

INDUSTRIES.

The several industries, including shoemaking, tailoring, mattress-making, broom-making, woodworking, carpentry, painting, brickmaking, sewing and dressmaking, bakery, laundry, gardening, farming and dairy, as well as the domestic departments, have all contributed towards the great work of keeping up our home. We have about 300 children employed in the various departments; then there is the army of children that do the seemingly little things about the house and grounds which institutionally counts for so much, such as helping care for their more helpless comrades, polishing the floors or keeping the premises clean and in order. The result of each child's labor may be slight, but in the aggregate it is of considerable importance.

COLONY FARM.

The farm colony, consisting of 510 acres and housing room for 182 boys, has become a very important adjunct to our institution, furnishing, as it does, an outlet for the labor of our larger, stronger boys. We have at the colony 142 boys; some assist in caring for the stock and work in the fields during the growing and harvest season; others are employed about the house, in the kitchen, dining-room and in keeping the premises in order. The net results from the farm have been satisfactory. The ground has yielded an average crop and the farm ledger shows a balance on the right side. Aside from a slight epidemic among the swine, from which we lost 35 head (supposedly from hog cholera), our farming operations have been successful and fairly profitable.

RELIGIOUS SERVICES.

Chapel services are held in the main hall and at each of the cottages every Sabbath morning. The service is made general in character, that it shall not conflict with the creed or faith of any sect. All holidays and special occasions are observed with fitting ceremonies.

RECREATION AND AMUSEMENT.

The dances given weekly, bi-weekly entertainments and monthly birthday celebrations, together with picnics and nutting parties, all have their influence on the life of the child. The Girls' Orchestra and Boys' Band give frequent concerts in the main auditorium and are always a source of great pleasure to the children.

One of the problems of institution life is how can the child be kept busy on the playground. The question is not so difficult when applied to the girls only. The boy, however, presents an entirely different phase. By nature he is a roamer; he is not satisfied to play any one game for any length of time in any one place; he must be moving about and invariably he turns up at the place where he has been told not to go; yet, if he were not there he would not be a boy. It is my wish to make the play grounds of both boys and girls so attractive with appliances for amusement and exercise that while there they will find all their young healthy spirit requires and must have if they are to grow and develop as we would have them. The boys must have playgrounds large enough to enable them having several different games going at the same time and the groups separated a sufficient distance to prevent conflict one with the other. This is not possible at the present time for lack of available space on that part of the grounds where the department for boys is situated.

MAINTENANCE.

The maintenance appropriation for the past year was $122.-000.00, based upon an actual attendance of 1,000 inmates, with an excess allowance of $122.00 per capita per annum for each inmate over that number. The excess maintenance for the year amounted to $13,103.85. The Legislature also granted a special appropriation of $10,000.00 to supplement our maintenance fund for this fiscal year, making our total maintenance for the year $145,103.85. The expenditures for all purposes except repairs and improvements were $145,100.10.

GENERAL REPAIRS.

The appropriation for repairs and painting is insufficient to keep up repairs on buildings and permanent fixtures. Each year it has been necessary to allow some item of repair to go over into the next year, or until appropriations for the next fiscal year are available. This is not always a wise procedure, for if economy is to be practiced, repairs to buildings and equipment must be made promptly, and this can not be done unless the appropriation for repairs is increased.

SPECIFIC APPROPRIATIONS.

The last Legislature made the following specific appropriations available this year:

Cold storage and ice plant	$7,500 00
Fire escapes	2,500 00
Oil separator	150 00
Motor and equipment, wire and poles (brick yard)	1,000 00
Farm drainage and fencing	1,500 00
Becket ditch assessment	1,335 07
Taxes on land purchased in 1907	181 34
Cement walks, roadways and grading	1,000 00
Iron fence	2,000 00
Bakery equipment (machinery)	2,500 00
Brick-making plant	2,500 00
Total	$22,166 41

The cold storage and ice plant includes a one-story brick slate roof building, 48 ft. x 58 ft. 7 in., with six cooling rooms and separate rooms for meat cutting, butcher's machinery, ice plant and office. The ice plant has been running successfully since July, but we have not put the cooling rooms into service on account of a part of the insulation not being finished. Three of the cooling rooms were not insulated for want of funds, but the parts completed can be used without serious inconvenience until the Legislature grants an additional appropriation to finish the plant. Fire escapes are being constructed. The oil separator has been installed, as has also the motor and equipment for the brickyard. Putting in tile drains and building fence at the farm progresses as the season and the time of our men will permit. Cement walks and iron fence at the main institution are nearly completed. The bakery equipment, including dough mixer, divider, mouding machine, cake machine, proof room, troughs and racks, has been installed and is working satisfactorily. Only a portion of the brick to be used in the new cottage for adult females were made this year. Lack of help at the beginning of the season and a serious break in the brick machine during the early fall caused a loss of about one-half the brick making season. New machinery has been installed and nothing should prevent us getting an early start on the yard next spring.

LOSS OF WAGON SHED BY FIRE.

The frame wagon shed on the main institution grounds was destroyed by fire on May 29th, 1909. The origin of the fire is unknown, but is supposed to have been caused by spontaneous combustion. The shed and contents were fully insured, the amount of insurance being $300.00, which amount was collected from the insurance companies and deposited with the Auditor of State to be credited to the general fund of the State.

SPECIAL MENTION.

A vote of thanks is due our friend and neighbor, Mr. D. N. Ninde, who has so generously allowed our boys the use of the field in front of the institution grounds for their ball games and other sports.

IN CONCLUSION.

I desire to assure the officers and employes generally of my hearty appreciation of their loyalty and willingness at all times to assist in carrying on the work of our home.

And to the Board of Trustees, I am deeply grateful for their continued confidence and ever ready and helpful counsel.

Respectfully submitted,

ALBERT E. CARROLL,
Superintendent.

REPORT OF SCHOOL PRINCIPAL.

To the Superintendent:

The following is a brief report concerning the institution schools. The enrollment continues at about 400, half day schools, each child above kindergarten being given one special kind of work, under a special teacher, in addition to his regular half day school. By enlarging cloak rooms and making extensions in the school house basement, we have added four new rooms. This allows all schools in the main school building. The basement rooms are not at best very desirable on account of light, ventilation, approach, and noise consequent to being under the gymnasium. What repairs were possible, however, have been made. These should be of only temporary use until the erection of an extension, or a new school building.

One of the new basement rooms is used for what we call "general manual." This is a new department. Each school goes twice weekly, an hour each period, and is given hand work within their grasp. The simplest work would be winding and unwinding balls of cord, the most advanced, basketry and book binding.

The mechanical drawing and knife work has a room now separate from the bench and tool room. We have added a new outlay of tools, and with one or two yearly additions this department will be well equipped.

The kindergarten, primary, and grade classes are pursuing practically the same work as during the past year. The same is true of the art, fancy needle, and clay modeling. Our gymnasium is employed daily for classes in physical training. Several new pieces of apparatus could be well used, although as a whole, the gymnasium is very serviceable. The band, orchestra, piano and general singing continue the same.

A few simple measuring and sense instruments should be added to special school that records from these might supplement what mental progress is made. The boys' reading-room is crowded each night. The contact with good books can not but be a benefit. We add about fifty volumes yearly to the children's library.

We expect by March first to have our "Indiana School Reader and Speller" completed. This is composed of the children's own original stories and is illustrated by them. The printing and plates

will be done outside. The advanced pupils will fold, sew and bind in the general manual class. We know of no other reader that has ever been composed and made by school children. These books can be made complete at a less cost than the average reader we buy. The vocabulary is the child's own and the stories are from his own daily experiences, with illustrations of his own making.

The teaching corps, counting band and orchestra, numbers seventeen. I believe in the best pay for ones holding these responsible positions. The maximum salary should be raised. At the same time I most certainly want the highest efficiency and the whole thought of the teacher. School is work, and the teacher who makes it anything else can go elsewhere. We should have the best. If she remains, she is the best. She should be endowed with those special qualifications of charity and love, patience and optimism, interest and unselfish zeal so necessary in leading the deficient child. The school is able to hand to you a twenty-five page graded course of study, the first of its kind for backward and deficient children. It is the experience of the teachers for several years past, and should be printed. Two things above all others we wish to acknowledge. No school, the public not excepted, is supplied with more and better material with which to work, and no school has more confidence placed in it to get results. All this we thank you for and most certainly appreciate.

Respectfully submitted,

Cyrus D. Mead,
Principal.

REPORT OF RESIDENT PHYSICIAN.

To the Superintendent:

I have to report the following concerning the medical department for the fiscal year ending September 30th, 1909:

During the year we have had thirty-one deaths, making a mortality rate of 2.7 per cent.

Admittances to the hospital have numbered, girls 1,020, boys 723, making a total of 1,743. Seven thousand two hundred eighty patients were cared for at the morning dispensary.

Fortunately we have escaped all signs of an epidemic. We have had three cases of typhoid fever. Most strict measures are being taken to avoid having a typhoid carrier among the children.

The prevalence of tuberculosis in any institution is more marked than in less populous communities. This institution shares the common fate. If this disease is ever to be lessened we must have larger and more thorough facilities for the care of our active tuberculous cases. Hence I urge the necessity for a new hospital, of which we are greatly in need.

Dr. Charles H. George served as interne from January to July, 1909. His services were very satisfactory. Dr. Edward E. Edwards was appointed to serve as interne for the year 1909 and 1910. Dr. Edwards is accurate, conscientious and willing in performing all of his duties.

Dr. Charles T. Johns, as dental surgeon, has shown himself efficient and painstaking.

The hospital corps has been most loyal and each individual has shown willingness in performing any duty which has fallen to his lot. I owe each one my sincerest thanks and gratitude.

Appended you will find the mortality list, a list of the more important medical and surgical cases and the report of the dental surgeon.

Respectfully submitted,

H. K. Mouser,
Resident Physician.

LIST OF OFFICERS AND EMPLOYES, SEPTEMBER 30, 1909.

Name and Position.	*Wages.*
A. E. Carroll, superintendent	$208 33
Nora Griffin, matron	50 00
Harold K. Mouser, resident physician	125 00
E. E. Edwards, medical interne	25 00
C. T. Johns, dental interne	25 00
M. Druckemiller, chief clerk	100 00
Leone P. Marsh, superintendent's secretary	45 00
*Nellie L. Evans, bookkeeper's assistant	30 00
Margaret Townsend, record clerk	25 00
Carrie L. Griffith, night clerk	35 00
Frank Johnson, storekeeper	50 00
Frank Anglin, storekeeper's clerk	35 00
Cyrus D. Mead, principal	100 00
Mrs. M. A. Summerbell, teacher	40 00
Marie Wintermote, teacher	40 00
Grace Thompson, teacher	40 00
Mildred Winch, teacher	35 00
Marjorie Smith, teacher	35 00
Fern Thompson, teacher	35 00
Mayme Ross, teacher	35 00
Zillah Bothwell, teacher	35 00
Marie Fowble, teacher	30 00
Johanne Hansen, teacher	40 00
Hazel MacDonald, teacher	40 00
Dea C. Murray, teacher	40 00
Beulah Harper, teacher	40 00
George Von Eberhart, orchestra leader	40 00
*G. J. Thompson, band director	45 00
Harry Thompson, supervisor	40 00
Margaret Shie, attendant	20 00
Beatrice Harvey, attendant	15 00
Ella Burroughs, attendant	20 00
Guy A. Forbes, attendant	18 00
Herbert Gray, attendant	18 00
Harry B. Reeves, attendant	18 00
Oscar Bell, attendant	30 00
James Winch, attendant	25 00
Mrs. Nora Winch, attendant	20 00
Herman O. Askin, attendant	25 00
J. Wallace Adams, attendant	25 00
Josephine Whittles, supervisoress	35 00
Jennie Herrman, attendant	18 00
Roxie Thomas, attendant	20 00
Emma Oldham, attendant	20 00
Mabel Ledgerwood, attendant	18 00
Anna B. Godwin, attendant	20 00

Name and Position	*Wages.*
Mae Eddington, attendant	$20 00
Rose Murphy, attendant	20 00
Maggie McCartney, attendant	20 00
Mary Anderson, attendant	20 00
Ada Burroughs, night attendant	25 00
Ella McCormick, supervisoress	35 00
Goldie Burdoine, attendant	12 00
Clara Keplinger, attendant	12 00
Phoebia Squires, attendant	22 50
Iva Malott, attendant	12 00
Emma Treadway, attendant	22 50
Mrs. Ora May, attendant	22 50
Amelia Bowman, attendant	18 00
Rose Cochran, attendant	25 00
Alice Wilson, supervisoress	35 00
Wm. Mundt, attendant	25 00
Elmer Thompson, attendant	30 00
Mrs. Elmer Thompson, attendant	22 50
Mrs. Eva Shephard, attendant	18 00
Frank M. Gross, attendant	25 00
Harry Beaman, attendant	20 00
Elmer F. Smith, attendant	20 00
E. A. Geiger, attendant	25 00
Artnur Bayh, night attendant	25 00
Bella MacTavish, supervisoress	35 00
Estella Burroughs, attendant	22 50
Bertha Campbell, attendant	15 00
Auda Regadanz, attendant	22 50
Mrs. M. Clippinger, night attendant	25 00
Frances Thompson, head nurse	40 00
Margaret Carney, nurse	22 50
Ethel Bradshaw, nurse	22 50
Mary E. Lowry, night nurse	30 00
Wm. Smith, supervisor	60 00
Frank Christie, attendant	25 00
John C. Bench, attendant	25 00
Otto Ritcha, attendant	25 00
Silas Harrold, attendant	20 00
Ray R. Stewart, attendant	20 00
Oscar R. Hook, attendant	25 00
Byron Tindall, night attendant	30 00
Dora Corbin, cook	25 00
Kittie Hargrave, cook	25 00
Alma E. Kinney, cook	25 00
May Morris, cook	25 00
Mrs. Mary Forbing, cook	25 00
Mary A. Bolar, cook	20 00
Anna E. Taylor, cook	25 00

Name and Position.	*Wages.*
Maggie Griffin, housekeeper	$25 00
Mrs. B. McConahy, domestic	20 00
Anna Gormley, domestic	20 00
Mrs. B. Deardorff, domestic	20 00
Susan Carroll, domestic	20 00
Mrs. Ida Bell, domestic	20 00
Minnie Stuti, domestic	20 00

Thirty-Second Annual Report

OF THE

INDIANA SCHOOL FOR FEEBLE-MINDED YOUTH

FORT WAYNE, INDIANA

For the Fiscal Year Ending
September 30, 1910

To the Governor

INDIANAPOLIS:
WM. B. BURFORD, CONTRACTOR FOR STATE PRINTING AND BINDING
1911

THE STATE OF INDIANA,
EXECUTIVE DEPARTMENT,
December 19, 1910.

Received by the Governor, examined and referred to the Auditor of State for verification of the financial statement.

OFFICE OF AUDITOR OF STATE,
INDIANAPOLIS, December 19, 1910.

The within report, so far as the same relates to moneys drawn from the State Treasury, has been examined and found correct.

W. H. O'BRIEN,
Auditor of State.

DECEMBER 23, 1910.

Returned by the Auditor of State, with above certificate, and transmitted to Secretary of State for publication, upon the order of the Board of Commissioners of Public Printing and Binding.

MARK THISTLETHWAITE,
Secretary to the Governor.

Filed in the office of the Secretary of State of the State of Indiana, December 23, 1910.

L. G. ELLINGHAM,
Secretary of State.

Received the within report and delivered to the printer December 23, 1910.

A. E. BUTLER,
Clerk Printing Board.

BOARD OF TRUSTEES.

Anthony M. Ellering, President, Michigan City.
Albert P. Sinclair, Vice-President, Cloverdale.
James W. Sale, Treasurer, Bluffton.
Mrs. Mary R. Harper, Secretary, Fort Wayne.

OFFICERS.

Albert E. Carroll, Superintendent.
Nora Griffin, Matron.

MEDICAL DEPARTMENT.

Charles G. Beall, M. D., Physician in charge.
Nellie Hanaway, M. D., Interne.

MEDICAL CONSULTING STAFF.

Surgery.

Miles F. Porter, A. M., M. D.

Internal Medicine.

B. Van Sweringen, M. D.

Eye, Ear, Nose and Throat.

Kent K. Wheelock, M. D.

ACCOUNTING DEPARTMENT.

Melvin Druckemiller, Chief Clerk.
Leone P. Marsh, Superintendent's Secretary.
Jessie Lindsey, Stenographer and Bookkeeper.
Carrie Griffith, Night Clerk.
Margaret Townsend, Record Clerk.
Frank Anglin, Storekeeper.

SCHOOL DEPARTMENT.

Grace Thompson, Grammar Grade and Library.
Mrs. Alice Summerbell, Receiving School.
Marjorie Smith, Kindergarten.
Priscilla E. Howard, Kindergarten and Primary.
Mrs. Martha Kimble, Primary.
Mayme B. Ross, Primary.

Marie Fowble, Primary and Intermediate.
Fern Thompson, Primary and Intermediate.
Marie Wintermote, Art and Grammar Grade.
Zillah Bothwell, Art Needle Work.
Pearl L. Homes, Carpentry, Sloyd and Clay Modeling.
Dea C. Murray, General Manual.
Isabella Brayman, Physical Training.
Blanche Gaisson, Voice and Piano.
Georgia Von Eberhart, Girls' Orchestra.
G. J. Thompson, Boys' Band.

HEADS OF DEPARTMENTS.

William J. Smith, supervisor colony farm.
Harry Thompson, supervisor east wing boys' ward.
Alice Wilson, supervisoress custodial cottage for boys.
Josephine Whittles, supervisoress west wing girls' ward.
Ella McCormick, supervisoress custodial cottage for girls.
Bella MacTavish, supervisoress cottage for adult females.
Frances Thompson, head nurse.
Lew DeHaven, chief engineer.
Fred L. Tilbury, woodworking.
Ernst Reinewald, painting.
Henry Meurer, mattress making.
Fred Koenig, tailoring.
John A. Miller, shoemaking.
Andrew Heinzleman, bakery.
C. N. Robertson, cold storage.
John Dickson, farm and dairy.
Morris Pullin, gardener.
Gustav Wunderlin, florist.
M. Q. Campbell, outside overseer.
Kate Gormley, laundry.
Rose Murphy, dressmaking.
Minnie Franks, mending and comfort.
Augusta Hopkins, sewing room cottage for adult females.
Mrs. M. McLaughlin, sewing room colony farm.
Goldie Burdoine, sewing room custodial cottage for girls.

Indiana School for Feeble-Minded Youth.

REPORT OF BOARD OF TRUSTEES.

To the Honorable Thomas R. Marshall, Governor of Indiana:

SIR—The Board of Trustees of the Indiana School for Feeble-Minded Youth, has the honor to present for your consideration its thirty-second annual report for the fiscal year ending September 30, 1910.

Attached will be found a detailed account of the year's work as reported by the Superintendent and physician, together with various statistical exhibits, giving in detail the operations of the institution for the past year.

No change in the personnel of the board has occurred during the year, the organization being the same as at our last report, viz.:

Anthony M. Ellering, President.
Albert P. Sinclair, Vice-President.
Mary R. Harper, Secretary.
James W. Sale, Treasurer.

Mr. Albert E. Carroll continues at the head of the organization as Superintendent, and his efficiency grows with the passing years. He has succeeded in surrounding himself with an excellent corps of assistants, and with one exception, retains the same heads of departments as at our last report. The subofficers have become well trained in their respective duties, and are thoroughly loyal to their Superintendent, leaving nothing to be desired in the executive organization.

For several years no change had been made in our wage scale for attendants and other employes, and the Superintendent found it extremely difficult to keep the various departments supplied with help, and an increasing tendency to a lowering of the standard of competency, until it became impossible to hold employes in the institution for extended periods, because they were continually finding more remunerative positions. The board deemed it imperative that a slight advance be made in the schedule, and it was done during

the year, since which we have had much better success in holding our employes, particularly the attendants.

The population of the school, and the average attendance, shows but a slight increase for the year, owing to the crowded condition of the various departments. However, the applications accepted pending room, that we are unable to admit, have grown from 53 one year ago to 86 at this time, and are classified as follows: Boys, 11; girls, 29; adult females, 46. With the completion of the new adult female college (now under construction), we shall be able to take care of those adults now waiting, and about 90 more, which will take care of that class for some years to come. The quarters for girls of school age are already overcrowded, and we shall only be able to take care of those now waiting (29), and future applications, as vacancies occur by withdrawal or death, until additional accommodations are provided.

After careful consideration and discussion of the subject for more than a year, the board has reached the conclusion that there is an ultimate capacity beyond which this institution ought not to go, and have made our recommendations as to the needs of the institution or the next biennial period accordingly. These requests will be found in detail in Superintendent Carroll's report under the heading, "Needs of the Institution," to which you are respectfully referred, and which are heartily endorsed by the board. Our great need at this time is a new hospital of sufficient size to accommodate our present population. With this new building, we will be able to convert our present hospital, at a comparatively small expense, into a girls' cottage, and with the completion of these buildings, we will have a capacity for approximately 1,450 inmates, which, with 175 to 200 employes, will be as much as one executive head can properly care for. We also feel that by the time this increased room is filled, that the epileptic institution will have sufficient buildings to relieve this institution of at least 200 to 300 epileptics now in this institution that will properly belong there. With such a transfer, this institution would then be able to care for strictly feeble-minded children for years to come, without further expenditures for buildings, either here or elsewhere.

We are pleased to call your attention to the fact that the value of our farming operations is increasing year by year and is becoming of first importance in our industrial department.

Our deposits with the State Treasurer for tuition and industrial earnings for the fiscal year amount to $5,339.36, showing a gain over the previous year of $1,053.92. After deducting this amount from

our total maintenance expense (exclusive of repairs) we have a net cost per capita of $126.12.

In our annual report for 1906, we made certain recommendations as to changes in the laws governing this institution, which were not acted upon by the General Assembly. With four additional years of experience, we are convinced that these changes should be made, and desiring to reiterate and emphasize their importance, we wish to again incorporate them in this report, as follows:

"Each year we are confronted with a number of withdrawals of children from the institution by their parents or guardians, and although in many of these cases the withdrawals are made against the judgment of your Board of Trustees, yet we are helpless under the present law to avoid them. We would therefore respectfully call your attention to our earnest recommendation for a change in the law governing the admission of children under sixteen years of age into this institution. We believe that the State should have the right of permanent supervision and that children should be placed in the institution by commitment made by the Circuit Court of the county in which such child resides, rather than by voluntary application. By doing this, the Board of Trustees would become the legal guardian of the child so committed by the court, and would be placed in a position to exercise its best judgment in permitting withdrawals from the institution. We believe this change in the law would conserve the best interests of the State in caring for its unfortunate wards. We would also recommend that the statute be changed so as to define more particularly the class and type of defectives that shall be cared for by this institution. Sec. 3, Act of 1887, says: "The purpose of this institution shall be to care for, support, train and instruct feeble-minded children, the term feeble-minded to include idiotic, epileptic and paralytic children." At the time of the enactment of this law the State had no other institution in which the epileptic children could be placed, but we believe from this time on that the new Village for Epileptics should take care of all this class of defectives. The paralytic is not necessarily mentally deficient, and it is neither proper nor just that they be consigned to this institution and surrounded by those who are mentally deficient.

We also wish to add this further recommendation, viz.: The statute regulating the payment of tuition for inmates under sixteen years of age should be amended to include women committed to the department for adult females. A number of the women now in the

institution either have incomes sufficient to pay for their institutional support, or parents amply able to provide for them, yet under the present law governing commitments, we are not authorized to make any charge in such cases. It is the opinion of the board that whenever a parent is financially able or the inmate is possessed of any estate, they should be required to pay wholly or in part, the maintenance cost of such person while in the institution.

A complete statement of the regular and specific appropriations made by the last General Assembly, and the disbursement of the same for the fiscal year ending September 30, 1910, is as follows:

Maintenance.

Regular appropriation	$130,000 00	
Excess on 123.379 inmates over 1,000	16,037 73	
Expenditures as per Exhibit No. 2		$146,020 21
Reverted to State Treasurer		17 52

Repairs.

Regular appropriation	$7,500 00	
Expenditures as per Exhibit No. 3		$7,494 87
Reverted to State Treasurer		5 13

Cold Storage and Ice Plant.

Appropriation	$7,500 00	
Expenditures in fiscal year ending September 30 1909	2,657 72	
Balance for fiscal year ending September 30, 1910	$4,842 28	
Expenditures as per Exhibit No. 4		$4,842 28

Fire Escapes.

Appropriation	$2,500 00	
Expended in fiscal year ending September 30, 1909.	197 25	
Balance for fiscal year ending September 30, 1910	$2,302 75	
Expenditures as per Exhibit No. 5		$2,219 39
Reverted to State Treasurer		83 36

Oil Separator and Duplex Trap System.

Appropriation	$150 00	
Expended in fiscal year ending September 30, 1909.	32 00	
Balance for fiscal year ending September 30, 1910	$118 00	
Expenditures as per Exhibit No. 6		$105 84
Reverted to State Treasurer		12 16

Farm Drainage and Fencing.

Appropriation	$1,500 00	
Expended in fiscal year ending September 30, 1909.	911 36	
Balance for fiscal year ending September 30, 1910	$588 64	
Expenditures as per Exhibit No. 7		$588 56
Reverted to State Treasurer		08

Cement Walks, Roadways and Grading.

Appropriation	$1,000 00	
Expended in fiscal year ending September 30, 1909.	104 73	
Balance for fiscal year ending September 30, 1910	$895 27	
Expenditures as per Exhibit No. 8		$895 27

Cottage for Adult Females.

Appropriation	$60,000 00	
Expenditures as per Exhibit No. 9		$19,286 58
Amount unexpended		40,713 42

Iron Fence.

Appropriation	$2,000 00	
Expenditures as per Exhibit No. 10		$1,986 03
Reverted to State Treasurer		13 97

Bakery Equipment.

Appropriation	$2,500 00	
Expended in fiscal year ending September 30, 1909.	1,881 10	
Balance for fiscal year ending September 30, 1910	$618 90	
Expenditures as per Exhibit No. 11		$183 76
Amount unexpended		435 14

Brick Making Plant.

Appropriation	$4,000 00	
Expenditures as per Exhibit No. 12		$2,859 31
Amount unexpended		1,140 69

Motor and Equipment for Wire and Poles—Brick Yard.

Appropriation	$1,000 00	
Expended in fiscal year ending September 30, 1909.	715 72	
Balance for fiscal year ending September 30, 1910	$284 28	
Amount unexpended		$284 28

Tuition Receipts and Industrial Proceeds and Earnings.

Receipts from tuition accounts.....	$4,303 39	
Industrial proceeds and earnings.....	1,095 97	
Deposited with State.....		$5,399 36

Respectfully submitted,

ANTHONY M. ELLERING, President,
A. P. SINCLAIR,
MARY R. HARPER,
JAMES W. SALE,
Trustees.

REPORT OF SUPERINTENDENT.

To the Board of Trustees:

I have the honor to submit herewith the Thirty-Second Annual Report of the Indiana School for Feeble-Minded Youth for the fiscal year ending September 30, 1910:

MOVEMENT OF POPULATION.

	Boys.	Girls.	Adult Females.	Total.
Enrolled September 30, 1909	528	466	155	1,149
Admitted during the fiscal year	51	37	9	97
Total enrollment	579	503	164	1,246
Died during fiscal year	21	11	8	40
Discharged during the fiscal year	16	6	3	25
Withdrawn during the fiscal year	25	13	0	38
Total died, withdrawn and discharged	62	30	11	103
Enrollment September 30, 1910	517	473	153	1,143
On furlough September 30, 1910	7	2	0	9
Actual number present September 30, 1910	510	471	153	1,134

	Males.	Females.	Total.
Daily average actually present	512.233	611.146	1,123.379

	Boys.	Girls.	Adult Females.	T't'l.
Applications presented	57	54	24	135
Applications accepted pending room	54	53	24	131
Applications rejected and deferred	3	1	0	4
Applications on file pending room	11	29	46	86

The above table shows the need of increased facilities to care for girls and women of child-bearing age. The new building now in course of erection will amply provide for all commitments for women now on the waiting list, and all future commitments for some years to come; but girls of schoolable age, we can only receive as vacancies occur in the now overcrowded departments. Ample pro-

vision should be made for these girls at once; every year they are permitted to remain at large increases the possibility of their downfall, and added burdens to the State. Eventually they must come under supervision and it is best for the State as well as the child that this occur at an early age.

All applications for boys, except those of the lower custodial grade, have been accepted promptly. We still have room for a few boys of the higher grade or those susceptible to school training, but applications for boys belonging to the custodial grade must be held in abeyance for want of room.

DISTRIBUTION OF POPULATION.

	Enrolled.	Beds.
Main building—girls	300	286
Main building—boys	210	224
Custodial cottage for boys	161	159
Cottage, colony farm boys	146	154
Cottage for adult females*	153	133
Custodial cottage for girls*	173	192
	1,143	1,148

SCHOOL DEPARTMENT.

The school enrollment remains about the same as in former years. Every possible opportunity is given the child to progress. Not all of the children coming to the institution are susceptible to school training; in fact a very large number "fall by the wayside" —but they are not taken from the school-room until they have had a fair trial and have shown beyond the question of a doubt their inability to progress or be benefited.

We have an excellent corps of teachers; they are enthusiastic in their work and are responsible for the high standard our school department has attained.

Mr. Cyrus D. Mead, who has been our principal for the past six years, left the service at the close of the school year to take up work at Columbia University. Mr. Mead was faithful, loyal and a most helpful co-laborer in the work, and will be greatly missed by those who had grown to depend upon him for counsel and support at all times.

*Fifteen adult females are housed in the custodial cottage for girls.

MEDICAL DEPARTMENT.

The Hospital Department, working under adverse conditions, has taken good care of the sick of our family. During the past winter, aside from the usual list of diseases, we had 175 cases measles and 36 cases scarlet fever. We are seriously handicapped in our hospital work for lack of facilities to properly isolate infectious or communicable diseases. We are sadly in need of a new hospital building; the building now used for that purpose is unsuited, both in size and equipment, to properly care for the sick of an institution as large as ours.

Dr. I. L. Furnas, D. D. S., of the Indiana Dental College, had charge of our dental work the past year. His report will be found in connection with that of the physician in charge.

Dr. Harold K. Mouser, resident physician, resigned December 24, 1909, to take up the general practice of medicine.

Dr. Charles G. Beall, former resident physician, has been made physician in charge. He is assisted in his work by Dr. Nellie Hanaway, acting in the capacity of interne.

Your attention is respectfully directed to the report submitted by the physician in charge.

INDUSTRIES.

All of our industries have done splendid work the past year. Increased efficiency is shown in every department. Colony farm, with its dairy, garden and orchard, has enabled us to reduce our maintenance cost. The brickyard has furnished all the common brick used in constructing the new cottage for women. These brick were manufactured and delivered at the site of the building at a cost of $3.50 per thousand. All other departments, including shoemaking, tailoring, mattress-making, woodworking, carpentry, painting, sewing and dressmaking, bakery, laundry and the various domestic departments, have done much towards the training of our children and the success of our home.

RELIGIOUS SERVICES.

Religious services of a general character (nonsectarian), are held each Sabbath morning in the main chapel, and in each of the detached cottages.

RECREATION AND AMUSEMENT.

Every effort is made to give our children healthful, beneficial outdoor exercise, with such facilities as we have; but we need additional playground apparatus. This can be accomplished by adding a few pieces each year from our regular appropriation.

Playlets by the children, and concerts by the Girls' Orchestra and Boys' Band are given biweekly. Other forms of amusement are furnished at regular intervals, and help break the monotony of institution life during the long winter evenings.

MAINTENANCE.

The maintenance appropriation for the past fiscal year was $130,000, based upon an actual attendance of 1,000 inmates, with an excess allowance of $130 per capita per annum for each inmate actually present over that number. The excess maintenance for the fiscal year was $16,037.73; making our total maintenance allowance for the year, $146,037.73. The expenditures for all purposes, excluding repairs and improvements was $146,020.21.

The present maintenance allowance of $130 per capita per inmate, will be sufficient for all our needs the coming biennial period.

GENERAL REPAIRS.

All buildings have been kept in repair, but much of the plumbing in the older buildings is old and unsanitary, and should be replaced with new fixtures. This cannot be done unless an increase is made in the appropriation for repairs and painting.

SPECIFIC APPROPRIATIONS.

The Cottage for Adult Females, for which the last Legislature made appropriation, is in course of construction. If no unnecessary delays are experienced, the building should be ready for occupancy not later than May 1, 1911.

This cottage, when completed, will relieve our waiting list for women of child-bearing age, and enable us to receive promptly all such cases committed to us for several years to come.

NEEDS OF THE INSTITUTION.

Regular Appropriations—

Maintenance appropriation for 1911-12 and 1912-13, per annum, for 1,123 inmates..... $145,990

With an excess allowance of $130 per capita per annum for each additional inmate over that number.

Repairs and painting..... 8,500

We have asked repeatedly for an increase in this appropriation. Repairs to buildings and permanent improvements cannot be *properly* kept up on $7,500 per annum.

Specific Appropriations—

General hospital building and equipment.....	80,000
Remodeling old hospital building to be used for girls' cottage..	20,000
To complete cold storage plant.....	2,500
Dairy barn (colony farm).....	5,000
Power Equipment:	
(a) Two 150 h. p. tubular boilers	3,000
(b) Two 150 k. w. direct connected dynamos and engines	10,000
(c) Water softening plant.....	5,000
(d) Reservoir for water supply.....	7,000
Brick yard expense, one-half available 1911 and one-half 1912	5,000
Roadways and grading.....	2,500
Iron fence for east and north sides of grounds.....	2,300

Specific Appropriations.

General Hospital Building.—The present hospital building was erected twenty years ago to care for the sick of an institution accommodating 450 inmates; in 1896 the population had increased to 550 inmates and it was found necessary to add to the hospital building to properly care for the sick and those requiring medical attention. The population of the institution is now 1,147; this number will be increased to 1,300 when the Cottage for Adult Females, now in course of erection, is completed. To properly care for the sick in a family so large, it is imperative that we have adequate hospital facilities. The hospital building for which an appropriation is asked, contemplates the erection of a modern hospital, brick, fireproof construction, two-story with basement, equipped with all necessary apparatus to care for a total of 120 beds, including ample room for the separation and isolation of all cases afflicted with infectious or communicable diseases. Special provision has been made for the treatment of tuberculous cases. The amount asked for this improvement is $80,000.

Remodeling Old Hospital Building to Be Used as a Cottage for Girls.—The remodeling of this building by adding one wing on the east and a dining-room and kitchen on the north, together with a few minor interior changes, would give us room for 75 to 80 additional girls. Every department for girls is crowded beyond its capacity and we still have 30 applications on the waiting list that cannot be received for want of room. With proper alterations and additions the old hospital building can be made into a very serviceable and satisfactory cottage for girls. The amount asked for this improvement is $20,000.

Complete Cold Storage Plant.—An appropriation of $7,500 was granted by the last Legislature for this improvement; after the appropriation was made and before contracts were awarded, it was deemed advisable to use a higher grade of insulation than that originally specified. This change necessitated leaving a part of the building unfinished, i. e. three rooms for the following uses: salt and cured meats, vegetables, and ice storage. Amount necessary to complete plant, $2,500.

Dairy Barn.—To care for the increase in the dairy herd we are asking for a two-story, brick barn, 100′ x 40′, with two 150-ton silos attached, first floor of barn to be used for dairy cows and feed-room; second floor to be used for storing hay and other provender. Amount asked for barn, complete, $5,000.

Power Equipment.—The growth of the institution renders necessary the installation and additional equipment to furnish light and power for the several departments, adding sufficient capacity to care for the future needs of the institution, the following equipment is required:

Two 125 h. p. high pressure tubular boilers, 72″ x 16′, including settings	$3,000
Two 150 k. w., 36 pole, 200 R. P. M. alternators with direct connected exciter and 19″ x 20″ simple side crank engines, complete with foundations and steam connections	10,000
Water softening plant—One water softening plant capable of chemically treating 12,000 gallons of water per hour	5,000
Reservoir for Water supply—One concrete and brick reservoir, size 150′ x 50′ x 24′, to be used for storage of water for general use	7,000

Brickyard Expense.—For operating brickyard (payroll, purchase of fuel and other supplies), $2,500, to be available April 1, 1911, and $2,500, to be available October 1, 1911—total, $5,000.

Roadways and Grading.—To properly grade grounds and roadways a small appropriation should be available each year until the work is completed. For the biennial period ending September 30, 1912, we ask for the sum of $2,500.

Iron Fence.—The main institution grounds are now within the city limits of Fort Wayne, and for the protection of the institution and inmates, the iron fence should be continued to enclose the premises. About one-quarter of our property line is protected by barbed wire. It should be replaced by iron fence in keeping with that surrounding the balance of the ground. The amount required for this purpose is $2,300.

IN CONCLUSION.

It is a pleasure to again publicly acknowledge the loyalty and support of all those interested with me in this great work; their faithful devotion to duty at all times has made work a pleasure, and it is through their efforts alone that success has attended our labors.

To the Board of Trustees I gratefully acknowledge the continued bestowal of your confidence, and the many kindnesses you have shown me.

Respectfully submitted,

ALBERT E. CARROLL,
Superintendent.

September 30, 1910.

REPORT OF PHYSICIAN IN CHARGE.

To the Superintendent:

The general health of the inmates of the institution has been fairly good. There has been an epidemic of measles and also one of scarlet fever. But two deaths are attributable to the epidemics, and this is a fortunate result considering the number of cases.

There have been four isolated cases of diphtheria, but rigid isolation of the infected individuals and close observation of all exposed inmates has limited the spread of the disease.

Under present conditions it is impossible because of lack of room to keep newly-admitted inmates under observation in the hospital a sufficient length of time to rule out the possibility of their having an incipient contagious disease.

The mortality for the year was 3.56 per cent. By referring to the mortality table it will be seen that one-half of the deaths were among inmates of low grade mortality, and this class of inmates numbers less than one-third of the total population.

The present hospital facilities have become inadequate, even in every-day work. Our average hospital enrollment fills all beds and either leaves no room for contagious cases or forces convalescents out of the hospital too soon.

Dr. Nellie J. Hanaway entered upon her service as interne June 24, 1910.

The loyalty and interest of the nurses and hospital employes have added very materially to the efficiency of the hospital. Below is appended the mortality table and a list of the more important medical and surgical cases.

Respectfully submitted,

Chas. G. Beall,
Physician in Charge.

CASES TREATED.

Medical and Surgical.

Measles	175
Scarlet fever	36
Diphtheria	4

Appendectomy	2
Tuberculosis of spine	1
Tonsilectomy	4
Dislocation of shoulder	1
Fracture of nose	3
Fracture of radius	1
Fracture of tibia	2
Fracture of fibula	1

Dental Work Done in 1910.

Cleanings	425
Extractions	212
Amalgam fillings	187
Gum treatments for pyorrhea	57
Cement fillings	43
Gold fillings	10
Canal fillings	4

MORTALITY RECORD.

No.	Name.	Age.	Date of Death.	Cause of Death.	Grade of Child.
1	Jennie Wolford	48	Oct. 19, 1909	Lobar pneumonia	Low grade imbecile.
2	Peter Eiler	33	Oct. 31, 1909	Gastro-enteritis	Low grade imbecile.
3	Sadie Hattery	19	Nov. 10, 1909	Pulmonary and miliary tuberculosis	Medium grade imbecile.
4	Carl Rogers	14	Nov. 12, 1909	Septic pneumonia following furuncle of scalp	Medium grade imbecile.
5	Sylvia Schooley	26	Nov. 28, 1909	Double lobar pneumonia	Low grade imbecile.
6	John Barker	30	Dec. 3, 1909	Chronic endo- and pericarditis	Medium grade imbecile.
7	Frank Eads	.....	Dec. 5, 1909	Septicemia (lobar pneumonia)	High grade imbecile.
8	Fred Hutton	11	Dec. 21, 1909	Pulmonary tuberculosis and tuberculous enteritis.	High grade imbecile.
9	Arthur Fletcher	30	Jan. 2, 1910	Pulmonary tuberculosis	Low grade imbecile.
10	Nellie Lee	11	Feb. 6, 1910	Organic heart disease	High grade imbecile.
11	Viola Loomis Bair	13	Feb. 17, 1910	Suffocation following rupture of two suppurative tonsils	High grade Mongolian.
12	Ernest Griner	20	Feb. 19, 1910	Pulmonary tuberculosis	Low grade imbecile.
13	Glenn Gilpen	12	Feb. 23, 1910	Acute nephritis (scarlet fever)	Medium grade imbecile.
14	James Lawrence	26	Feb. 5, 1910	Pulmonary abscess following pneumonia	Low grade imbecile.
15	Florence Buck	19	Mar. 11, 1910	Broncho-pneumonia. Mitral insufficiency	High grade imbecile.
16	Edward Bliss	33	Mar. 13, 1910	Tubercular pneumonia	Low grade imbecile.
17	Phœbe Hayes	27	Mar. 20, 1910	General miliary tuberculosis	Medium grade imbecile.
18	Edmund Madden	22	Mar. 26, 1910	Intestinal tuberculosis	Microcephalic idiocy.
19	Chauncey Procter	23	Mar. 29, 1910	Pulmonary tuberculosis	Low grade imbecile.
20	Danny Wyland	.....	Mar. 30, 1910	Pulmonary tuberculosis	Low grade imbecile.
21	Goldie Anderson	23	Apr. 1, 1910	Acute tuberculous pneumonia, chronic diffuse nephritis	Low grade Mongolian.
22	Eugene Sutton	10	Apr. 9, 1910	Mesenteric tuberculosis	Low grade imbecile.
23	Nannie Hughes	21	Apr. 14, 1910	Lymphatic leukemia	High grade imbecile.
24	Eric Bloomer	19	Apr. 23, 1910	Pulmonary tuberculosis	Low grade imbecile.
25	Claude Hazeltine	17	Apr. 24, 1910	Mesenteric tuberculosis	Low grade idiocy.
26	Effie Haynes	21	May 3, 1910	Toxemia and pneumonia, complicating measles	High grade imbecile.
27	Harley Worley	22	May 10, 1910	Status epilepticus. Abscess right lung	Low grade imbecile.
28	Effie Harris	28	May 21, 1910	Organic heart disease	Medium grade imbecile.
29	Katie Helmuth	38	May 23, 1910	Pulmonary tuberculosis	Medium grade imbecile.
30	George Jones	11	May 27, 1910	Broncho-pneumonia	Medium grade imbecile.
31	Cora Chickadonza	.....	June 14, 1910	Mesenteric tuberculosis	Low grade epileptic.
32	Bertha Booth	33	July 5, 1910	Mesenteric tuberculosis	Low grade imbecile.
33	William Sefton	9	July 9, 1910	O. H. D. Chronic adhesive pericarditis	High grade imbecile.
34	Roy Durham	28	July 28, 1910	Typhoid fever, pneumonia	High grade imbecile.
35	Marjorie Melick	14	July 30, 1910	Pneumonia-ileo colitis	Medium grade imbecile.
36	Gertrude Hartman	16	Aug. 6, 1910	Mesenteric tuberculosis, lobar pneumonia	Low grade imbecile.
37	Mary Buchanan	39	Aug. 14, 1910	Status epilepticus and pneumonia	Medium grade epileptic.
38	Francis Schriner	35	Aug. 17, 1910	General purulent peritonitis, pulmonary and mesenteric tuberculosis	Low grade imbecile.
39	Pearl Cochrin	32	Aug. 23, 1910	Broncho-pneumonia and phthisis	Medium grade epileptic.
40	Margaret Palmer	18	Aug. 28, 1910	Mesenteric tuberculosis	Low grade imbecile.

FINANCIAL.

EXHIBIT No. 1.

Consolidated Statement of Revenue and Disbursements for the Fiscal Year ending September 30, 1910.

Maintenance—		
Regular appropriation	$130,000 00	
Excess on 123.379 inmates over 1,000	16,037 73	
Expenditures as per Exhibit No. 2		$146,020 21
Reverted to State Treasurer		17 52
Repair Fund—		
Regular appropriation	$7,500 00	
Expenditures as per Exhibit No. 3		$7,494 87
Reverted to State Treasurer		5 13
Cold Storage and Ice Plant—		
Appropriation	$7,500 00	
Expenditures in fiscal year ending Sept. 30, 1909	2,657 72	
Balance for fiscal year ending Sept. 30, 1910	$4,842 28	
Expenditures as per Exhibit No. 4		$4,842 28
Fire Escape Fund—		
Appropriation	$2,500 00	
Expended in fiscal year ending, Sept. 30, 1909.	197 25	
Balance for fiscal year ending Sept. 30, 1910	$2,302 75	
Expenditures as per Exhibit No. 5		$2,219 39
Reverted to State Treasurer		83 36
Oil Separator and Duplex Trap System Fund—		
Appropriation	$150 00	
Expended in fiscal year ending Sept. 30, 1909.	32 00	
Balance for fiscal year ending Sept. 30, 1910	$118 00	
Expenditures as per Exhibit No. 6		$105 84
Reverted to State Treasurer		12 16
Farm Drainage and Fencing Fund—		
Appropriation	$1,500 00	
Expended in fiscal year ending Sept. 30, 1909..	911 36	
Balance for fiscal year ending Sept. 30, 1910	$588 64	
Expenditures as per Exhibit No. 7		$588 56
Reverted to State Treasurer		08

Cement Walks, Roadways and Grading Fund—		
Appropriation	$1,000 00	
Expended in fiscal year ending Sept. 30, 1909	104 73	
Balance for fiscal year ending Sept. 30, 1910	$895 27	
Expenditures as per Exhibit No. 8		$895 27
Cottage for Adult Females Fund—		
Appropriation	$60,000 00	
Expenditures as per Exhibit No. 9		$19,286 58
Amount unexpended		40,713 42
Iron Fence Fund—		
Appropriation	$2,000 00	
Expenditures as per Exhibit No. 10		$1,986 03
Reverted to State Treasurer		13 97
Bakery Equipment Fund—		
Appropriation	$2,500 00	
Expended in fiscal year ending Sept. 30, 1909	1,881 10	
Balance for fiscal year ending Sept. 30, 1910	$618 90	
Expenditures as per Exhibit No. 11		$183 76
Amount unexpended		435 14
Brick Making Plant Fund—		
Appropriation	$4,000 00	
Expenditures as per Exhibit No. 12		$2,859 31
Amount unexpended		1,140 69
Motor and Equipment for Wire and Poles, Brick Yard Fund—		
Appropriation	$1,000 00	
Expended in fiscal year ending Sept. 30, 1909	715 72	
Balance for fiscal year ending Sept. 30,1910	$284 28	
Amount unexpended		$284 28

DISBURSEMENTS.

From maintenance fund	$146,020 21
From repair fund	7,494 87
From cold storage and ice plant fund	4,842 28
From fire escape fund	2,219 39
From oil separator and duplex trap system fund	105 84
From farm drainage and fencing fund	588 56
From cement walks, roadways and grading fund	895 27
From cottage for adult females fund	19,286 58
From iron fence fund	1,986 03
From bakery equipment fund	183 76
From brick making plant fund	2,859 31
From motor and equipment for wire and poles, brick yard fund.	.....
Total	$186,482 10

No.	To Whom Paid.	Character of Claim.	Amount.
1178.	Scheidel-Western X-Ray C. Co.	X-ray machine	$125 00
1179.	F. M. Smith Co.	Hardware	8 00
1180.	Standard Oil Co.	Oils, etc.	56 68
1181.	Seavey Hardware Co.	Hardware, etc.	14 04
1182.	C. C. Schlatter & Co.	Hardware	5 88
1183.	Swift & Co.	Meats	369 73
1184.	Schwarzschild & Sulzberger	Meats	170 15
1185.	Schroeder Bros.	Harness	2 25
1186.	Star and Crescent Milling Co.	Flour	116 35
1187.	C. Tresselt & Sons	Flour and feed	49 70
1188.	E. Van Every	Smithing	17 25
1189.	Vaughn's Seed Store	Bulbs	16 45
1190.	Viberg & McMaken	Farm supplies	2 08
1191.	Volland Milling Co.	Rye	16 50
1192.	Wolf & Dessauer	Dry goods	32 50
1193.	Paul E. Wolf	Twine	4 50
1194.	Ben. Perley Weaver, M. D.	Professional service	10 00
1195.	West Disinfecting Co.	Disinfectants	18 75
1196.	Will A. Young	Orchestra supplies	7 40
1197.	L. C. Zollinger	Wagon repairs	1 50
1198.	James W. Sale, Trustee	Traveling expenses	3 60
1199.	Albert P. Sinclair, Trustee	Traveling expenses	13 85
1200.	Anthony M. Ellering, Trustee	Traveling expenses	26 65
1201.	Mary R. Harper, Trustee	Traveling expenses	2 00
1202.	S. Bash & Co.	Wire	1 00
1203.	Brookside Farm Co.	Stallion service	15 00
1204.	Western Electric Co.	Battery repairs	12 72
1205.	Burroughs Adding Machine Co.	Adding machine	245 00
1206.	Cummer Mfg. Co.	Wooden crates	30 00
1207.	D. N. Foster Furniture Co.	Carpets, etc.	189 30
1208.	The Packard Co.	Pianos	550 00
1209.	Volland Milling Co.	Flour	90 00
	Total		$9,952 96
	Grand total		$146,020 21

EXHIBIT No. 3.

Recapitulation by Vouchers of Expenditures from Repair Fund for Fiscal Year Ending September 30, 1910.

October, 1909.

No.	To Whom Paid.	Character of Claim.	Amount.
1.	A. E. Carroll, Supt.	Payroll	$178 87
2.	Otto Blombach	Plastering	3 25
3.	Edward M. Baltes	Cement	26 46
4.	Wm. Bushing Supply Co.	Lime and clay	6 80
5.	A. E. Carroll, Supt.	Incidentals	4 39
6.	E. F. Clausmeier	Sewer pipe	1 60
7.	Crane & Co.	Iron flag pole	135 00
8.	James B. Clow & Sons	Packing	2 88

EXHIBIT No. 3—Continued.

October, 1909—Continued.

No.	To Whom Paid.	Character of Claim.	Amount.
9.	Diether Lumber Co	Lumber	$78 00
10.	Ernst A. Ehle	Mason work	285 50
